

## Power Up Your Equipment With Cool Cable™ Brand IEC Power Cables

Many common lighting fixtures utilize the international standard IEC input/output system for power connection, and with the typical 5' cord included with most fixtures, this means running lots of extension cords. With our IEC power cables, you now have a rugged, affordable and simple solution to free yourself from extension cord land forever!

Our IEC cables are direct replacements for any fixture with an IEC power input/output connector, and available in 6, 10, and 25-foot lengths. They offer 16 gauge wire, which is a perfect medium weight that is thick but not too unyielding.

Plus, all our IEC cables are UL-listed and come with a lifetime warranty against defects!

# cool cable™
