World class. **Best sellers.**

From the number one brand in high-definition fixed lens projectors, Optoma's ProScene 515 series combines an unparalleled feature set with industry-leading technologies to offer an impressive image in conference rooms, houses of worship and other large venues.

#1

future
CONSULTING source

* According to Future Source WW Projector Report Q2 2016, Optoma is No.1 in lamp-based, high resolution, above 5000 lumens, fixed lens with H/V lens shift category in the Americas.

Ideal for [museum](#) and [public display](#) installs — 4 corner geometric correction allows for basic stacking solutions or use on uneven walls while 1.8x zoom provides excellent image quality from short or long distances.

Numbers matter for maximized flexibility.

"Overall, the EH515's combination of features add up to an impressive level of capability for the price, and help make the EH515 an excellent option for large conference rooms, houses of worship, and higher-education lecture halls."

David Stone, Projector Central

* Brightness ranges from 5500L to 6000L depending on resolution

Environmentally friendly in any [classroom or lecture hall](#), the 515 series offers energy saving features including Eco+ lamp power management, <math><0.5\text{W}</math> standby mode and auto power off, saving both time and money by prolonging lamp life.

Project **your** vision.

Packed with professional-grade features including high brightness and contrast ratios, it's easy to project the full power of your message with ProScene projectors. Key to venues large and small — including Environmental Projection worship experiences — Optoma's ProScene 515 series delivers cutting-edge visuals to every seat in the house.

"We purchased two projectors for our sanctuary. The brightness and clear performance offer the premium quality we had been searching for."

— New Life Christian Center
San Antonio, TX

PICTURE BY
DLP[®]
TEXAS INSTRUMENTS

From live concerts to sporting events, the Optoma 515 series, featuring DLP technology by Texas Instruments, provides accurate colors and high contrast — helping images come to life in every performance.

Easy to install. **Easy to use.**

Featuring multiple resolution options, extensive I/O ports and other top-of-the-line installation features — typically found in projectors available at twice the price — Optoma's ProScene 515 series is ideal for rental and staging applications, and environments where installation flexibility is key.

"I needed a portable projector with easy installation that I could take with me to conventions and events. The Optoma 515 series couldn't have been a more perfect fit at an affordable price."

*— Digital-One Audio/Video
Amarillo, TX*

Optoma

"We are very happy with our recent upgrade to the HD performance that the EH515 delivers. The radiology and pathology imaging along with slide based presentations are excellent and with a critical faculty of doctors, that is saying a lot."

– UCSF Fresno Medical Education Program
Fresno, CA

User friendly
in **every** installation.

From large lecture halls and classrooms to museum exhibits, houses of worship and beyond, Optoma's ProScene 515 series provides the reliability and peace of mind every venue needs with consistent color performance, Full 3D capability, and 3 years of Optoma's Express Service warranty.

Clear choice. **Every time.**

Packed to perform with industry-leading technology, Optoma's ProScene 515 series of installation projectors is efficient, effective and second to none.
