

GENERAL INFORMATION

Having the lights on full in an already well-lit area means wasted energy and bigger electrical bills. Unison Paradigm Light Sensors are the sensible way to solve that problem and lower energy expenditures. The Light Sensors have a neutral look that easily blends into their surroundings. The sensors are ready to go in their standard form, or you can detach the sensor's RemoLux head to use as a remote sensor. It is perfect for atriums and other spaces with high ceilings. Rated for use in wet locations, the light sensor can even be installed outdoors.
