

Sound Bar with Dual Built-in Subwoofers

# YAS-108

## The Easy Way to Enhance Your TV and Music

Complement your TV with theater-quality sound from your favorite movies, music, and games. This ultra-slim sound bar fits discreetly in front of your TV or on a shelf, or can be rotated for a low-profile wall mount. Setup is a breeze with a simple connection to your TV while Bluetooth® lets you wirelessly stream from your mobile devices and Bluetooth-capable Amazon Alexa devices.

- Built-in subwoofers for deep bass in one slim sound bar
- Clear Voice for enhanced dialogue clarity
- DTS® Virtual:X™ virtual 3D surround sound
- Bluetooth streaming that allows easy switching between two devices
- Simple setup with HDMI, optical or analog connection

### Stylish Simplicity

Striking the perfect balance between beauty and function, this sound bar features a slim, understated design that complements your TV while offering easily accessible touch-sensitive buttons and LED indicators that make it a pleasure to operate.

### Dynamic, Clear Sound

The YAS-108 delivers an immersive, all-encompassing listening experience thanks to its dual built-in 3" subwoofers, 2-1/8" woofers and 1" tweeters and its bass reflect port. Bass reflex port plus bass extension processing provide exceptional low-end performance without the need for a separate subwoofer box.

### Bluetooth Multipoint

Wirelessly connect up to two devices via Bluetooth, including Bluetooth-capable Amazon Echo devices, to hear music right from your sound bar. Designed for easy operation with quick switching between paired devices.

### Bluetooth Standby

The Bluetooth standby function can be used to turn on the unit when a Bluetooth connection between the unit and a Bluetooth-capable device, such as a smartphone or Amazon Echo, is established and to turn off the unit when that connection is terminated. It will also go into Bluetooth standby after 20 minutes if no audio signal is received.

# Sound Bar YAS-108

## Tabletop, Shelf or Wall Mount. The Choice Is Yours.

The YAS-108 sound bar fits in front of almost any TV without obstructing the screen image, or it can be placed on a lower shelf of a TV stand. It also has built-in keyholes, a removable power cord and comes with a mounting template in the box, making it easy to wall mount if desired.

## Enhanced Realism and Immersion

With DTS® Virtual:X™ the YAS-108 can virtualize immersive 3D surround sound, simulating sound effects that seem to move around the listener and even have a sense of height. Ideal for use with other multichannel content, including DTS® and Dolby encoded soundtracks, it creates more spacious, lifelike sound for all of your favorite TV shows, movies and games.

## Hard to Hear the Dialogue? Missing the Details?

No more. If you've been relying on your TV's built-in speakers, you know just how muddled they can sound. The YAS-108 delivers dynamic, exceptionally-clear sound that lets you hear all of the details you've been missing. It also features a special Clear Voice mode that brings dialogue and narration to the forefront, making voices more intelligible.

## Convenient Connections

Simple setup with HDMI®, optical or analog connections. A subwoofer output allows you to easily add a subwoofer.

## Easy Operation

Convenient remote places frequently used features at your fingertips, including 3D surround, Bluetooth for pairing, volume, and input selection.
