TwinPlex -- TwinPlex™ Lavalier Microphones

TwinPlex
TwinPlex™ Lavalier Microphones

General Description

TWIN:PLEX™

The Shure TwinPlex subminiature omnidirectional lavaliers are designed to perform better than other 5 mm lavalier microphones for professional theater, film, tv, and corporate events. The TwinPlex dual-diaphragm technology yields extraordinary gain-before-feedback, off-axis response, and low self-noise while delivering life-like, exceptional clarity free of digital interference. The cable itself is ultra quiet and has been tested to be the longest-lasting, most dependable cable in its class. The TwinPlex series features the most extensive accessories and connector options to date. TwinPlex 5 mm lavs not only meet premium market-leading expectations, they exceed them.

Features

- Exceptional sound quality from the all new TwinPlex dual-diaphragm element
    - Robust low frequency response with flat top end
    - Best in class specifications and dynamic range
    - Consistent off axis response results in increased gain before feedback
- Durability beyond the competition
    - Exclusive, double helix cable technology with redundant grounding
    - Nanocoated frequency caps for reduced sweat out
- Comprehensive accessories and microphone offerings
    - Over 60 color, sensitivity, frequency response, and connector options available
    - All new clips, mounts, and accessories designed on extended research and field testing
- High RF immunity for use with today's digital wireless systems.

- Paintable cables allow for discreet placement in professional theater applications.
- Interchangeable frequency response caps offer adjustable flat or presence responses (TL45, TL46, TL47).

Model Variations

Shure TwinPlex lavaliers are available in a variety of connector and sensitivity levels.

The Shure TwinPlex Cartridge

Over 6 years in development, the patent pending, TwinPlex Omnidirectional element was designed to offer best in class sound quality and specifications of any lavalier to date. It utilizes a dual-diaphragm design with two side firing elements as opposed to a single, end fired design. By essentially doubling the surface area of the diaphragm in the same amount of space, the TwinPlex design offers robust low frequency response, exceptional off-axis consistency, increased gain-before-feedback and low handling noise, resulting in a new tier of performance for 5mm microphones.

Care and Maintenance

The TwinPlex lavalier dual-diaphragm has a nanocoating which rejects the build-up of grit from sweat and water. It is designed to withstand being blown out with a can of air for quick clean-up.

RPM400 Preamplifiers

The RPM400 preamplifiers offer exceptional dynamic range utilizing an active gain circuit in a concise and small package. They are offered in two connector versions: TA4F and LEMO, which allows you to quickly take a wireless TL microphone and make it a wired solution. These preamplifiers require phantom power and can efficiently operate across a wide range of supply voltages from 12-48v.

Features

- Active circuit design with neutral gain mimics wireless for consistent gain output across wired or wireless applications.
- High RF immunity against unwanted interference.
- Short, compact design.
- Belt clip and table mounting kits for easy placement for a variety of applications.

Preamplifier Mounting Kit

TwinPlex XLR microphones include an under table mounting kit for temporarily or permanently mounting the amplifier. It includes preamplifier clip, 4 screws, and premium dual lock adhesive. The mounting kit and accessories are also sold separately.
