The Safety of Your Ears is in Your Hands

Get the most out of your equipment by playing it at a safe level – a level that lets the sound come through clearly without annoying blaring or distortion and, most importantly, without affecting your sensitive hearing. Sound can be deceiving. Over time, your hearing “comfort level” adapts to higher volumes of sound, so what sounds “normal” can actually be loud and harmful to your hearing. Guard against this by setting your equipment at a safe level BEFORE your hearing adapts.

ESTABLISH A SAFE LEVEL:

- Set your volume control at a low setting.
- Slowly increase the sound until you can hear it comfortably and clearly, without distortion.
- Once you have established a comfortable sound level, set the dial and leave it there.

BE SURE TO OBSERVE THE FOLLOWING GUIDELINES:

- Do not turn up the volume so high that you can't hear what's around you.
- Use caution or temporarily discontinue use in potentially hazardous situations.
- Do not use headphones while operating a motorized vehicle; the use of headphones may create a traffic hazard and is illegal in many areas.

S001a_A1_En

POWER-CORD CAUTION

Handle the power cord by the plug. Do not pull out the plug by tugging the cord and never touch the power cord when your hands are wet as this could cause a short circuit or electric shock. Do not place the unit, a piece of furniture, etc., on the power cord, or pinch the cord. Never make a knot in the cord or tie it with other cords. The power cords should be routed such that they are not likely to be stepped on. A damaged power cord can cause a fire or give you an electrical shock. Check the power cord once in a while. When you find it damaged, ask your nearest PIONEER authorized service center or your dealer for a replacement.

Condensation

Water droplets (condensation) may form inside the unit (on operating parts and lenses) in the winter, for example, if the unit is moved from a cold place into a warm room or if the temperature in the room in which the unit is installed rises suddenly (through heating, etc.). The unit will not operate properly and will not be playable with condensation inside. Let the unit stand for 1 to 2 hours at room temperature (though this time depends on the conditions of the condensation) without turning on the power. The water droplets will evaporate and the unit will become playable. Condensation can occur in the summer as well if the unit is exposed to the direct wind from an air-conditioner, etc. If this happens, move the unit to a different location.

About discs

Music CDs (CD-DA) as well as music files (MP3/AAC/WAV/AIFF) stored on CD-ROMs (CD-R/CD-RW) can be played on this unit.

- 8 cm discs cannot be played.

About USB devices

This unit supports USB mass storage class USB devices (external hard disks, portable flash memory devices, digital audio players, etc.).

Supported file systems	FAT16, FAT32 and HFS+ (NTFS is not supported.)
------------------------	--

Tracks managed by rekordbox (iOS/Android) can be played by connecting the mobile device on which rekordbox (iOS/Android) is installed via USB. For supported devices, see the Pioneer DJ website (<http://pioneerdj.com/support/>). For instructions on rekordbox (iOS/Android), see the rekordbox (iOS/Android) user's manual.

- Disc identification information as well as such information as cue points, loop points and hot cues can be stored on USB devices. The CDJ-900NXS does not include a hot cue function, so hot cues cannot be used on the CDJ-900NXS.
- Depending on the USB device you are using, you may not achieve the expected performance.
- There is no guarantee that all USB devices will operate on this unit.

For details, see this product's operating instructions on the CD-ROM.

Connections

- Be sure to turn off the power and unplug the power cord from the power outlet whenever making or changing connections.
- Refer to the operating instructions for the component to be connected.
- Connect the power cord after all the connections between devices have been completed.

- Do not disconnect the LAN cable when music files and/or information are being shared using PRO DJ LINK.

Basic style

Playback on this unit is performed mainly using tracks prepared with rekordbox installed on a computer.

- For instructions on operating rekordbox, see rekordbox (Mac/Windows)'s operating instructions. The rekordbox (Mac/Windows) operating instructions can be viewed from the rekordbox (Mac/Windows) [Help] menu.
 - Also, for DJ players and DJ mixers, up to four PRO DJ LINK-compatible players can be connected with LAN cables (CAT5e) using PRO DJ LINK connections.

- A switching hub (commercially available) is necessary to connect to a mixer equipped with only one LAN port. For mixers with enough LAN ports for all the DJ players and computers in the system, connect directly to the LAN ports on the mixer's rear panel, without using a hub.

PRO DJ LINK (USB Export)

- rekordbox music files and data can be exchanged with this unit using a memory device (flash memory, hard disk, etc.), eliminating the need to take a computer into the DJ booth. Such information as playlists, cues, loops and hot cues set in advance with rekordbox can be used for playback. The CDJ-900NXS does not include a hot cue function, so hot cues cannot be used on the CDJ-900NXS.
