Single Receiver Operation

1
On your Bluetooth® device, turn the Bluetooth® feature on.

2
Flip the "POWER" switch on JIB/BT4R receiver to power on and begin pairing.

3
The "Pair" LED will alternate flashing between blue and red when ready to pair.

4
In your Bluetooth® enabled device, scan for devices and locate the JIB/BT4R. Tap it to connect to the receiver.

5
When pairing is successful, the "PAIR" LED will remain blue.

Dual Receiver Operation

1
To use two receivers as a Stereo-Link pair, first repeat steps 1-5 to pair your Bluetooth® enabled device to the first receiver. Turn on the second receiver.

2
Press and release the "STEREO-LINK" button on both receivers at the same time.

3
The "Pair" LED will alternate flashing between blue and red when ready to link.
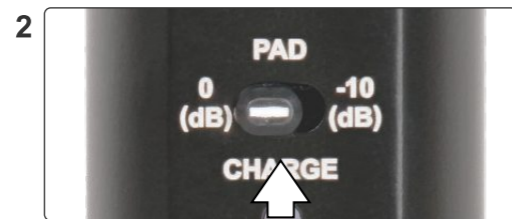

4
When linking is successful, the "PAIR" LED will slowly flash only blue. When playing audio, the LED will remain a solid blue.

Note:
To disconnect the Stereo Link, press and hold the "STEREO-LINK" button on either one receiver. The disconnected receiver will be the secondary that did not first pair with the Bluetooth® device. The disconnected receiver's "Pair" LED will alternate flashing between blue and red.

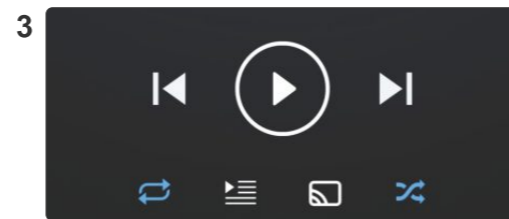

Setup

1
Plug receiver into an active speaker, amp, or mixer.

2
When plugged into Mic level input, a pad switch can be flipped for appropriate sensitivities.

3
Play your music from your Bluetooth® enabled device.

Note:
It is recommended to adjust the volume of devices in the following order:

1. Adjust the Bluetooth® enabled device volume higher.
2. If using a mixer, first adjust the input channel levels and then its main output level.
3. The active Speaker/Amp should be the last volume adjustment.

4
To charge the receiver, plug the Micro USB Charger into the charging input. The receiver can remain plugged in for more long-term use.

Quick Start Guide

FAQ

1. Q. Can someone steal my Bluetooth® connection?
A. No, once the JIB/BT4R is paired with a Bluetooth® enabled device, other devices can not pair with it.

2. Q. Is there a chance of interference with Bluetooth®?
A. There is always a chance of interference with any Bluetooth® connection. Bluetooth® is in the same frequency band as many cell phones and WiFi routers. These have higher outputs than Bluetooth® and can cause interference.

3. Q. How far does the wireless connection reach?
A. This JIB/BT4R has a range up to about 32.8 feet (10 meters), under ideal conditions.

4. Q. If I turn the JIB/BT4R off, will I have to reconnect my Bluetooth® device?
A. No, the JIB/BT4R remembers the last device it is paired with and will automatically reconnect.

5. Q. Can I pause the music from my Bluetooth® device using the JIB/BT4R?
A. No, you must pause the music on your Bluetooth® enabled device.
