

Remote Power Packs

PROK-1

The **PROK-1** is a unit protection kit, which consists of a set of side plates with, attached side brackets. The side plates protect the front panel controls and the rear XLR connectors from impact damage and provide attachment points for a shoulder strap (not included); the slide brackets allow easy quick change of remote power packs.

The **PROK-1** includes quick-change slides for the battery and converter modules. An attractive protective carrying bag with shoulder strap is available (ABAG-1) and includes the **PROK-1** protection plates.
