

TWELVE

MOTORIZED CONTROL TURNTABLE

Full 12-inch all-new black acrylic control disc with grooves

Motorized platter to control playback

Traditional, familiar turntable layout—no need to learn something new

Strip Search with 8 hot-cue-triggers access

5.0 kfcM high-torque motor with high/low torque adjust for more traditional setups

Four decks of control – DJ's can use one, two or more (dependant on number of mixer channels available)

Extreme precision—3,600 ticks of platter resolution for seamless performance

MIDI interface via USB that can be connected to the SEVENTY-TWO or your computer

33 1/3 and 45 RPM platter speeds

8/16/50% pitch with precise dual-resolution detented slider

TWELVE

The ultimate in legacy vinyl control for digital DJs and turntablists

The RANE DJ TWELVE is a motorized control turntable that brings a seamlessly accurate, true-vinyl performance experience to digital music software. It liberates DJs and Turntablists from the pain of damaged tonearms or needles and eliminates unwanted audio feedback, bringing sub-bass back into their music. The RANE TWELVE feels instantly familiar to any DJ who has played on a vinyl turntable before, but adds hot-cue and track search capability at the sweep or touch of a finger.

With no tonearm or damaged/skipping needles, the RANE TWELVE gifts the Pro, Club, Scratch and Battle DJ with a zero-error, secure and solid performance environment underpinned with an all-new new black acrylic control disc with grooves. This newly-designed control disc significantly enhances the DJ experience, providing better grip, resistance to warping and more consistent slip – a performance-centric change that surpasses the already-excellent current implementation.

The heartbeat of the music finally returns to the DJs fingertips! The TWELVE's twin-torque, 12-inch motorized platter gives 3,600 ticks of resolution, per single vinyl revolution. This brings precision music file playback with previously unrealized digital performance accuracy – customizable even further with a DJ's own choice of slipmat/butter-rug.

For too long now, Turntablists and DJs have had to compromise at live shows on their preferred levels of sub-bass frequencies, dialling it back in fear of feedback, rumble and noise. Now, with the RANE TWELVE, control vinyl DJs can #ReclaimTheBass and perform their music at the full frequency range enjoyed by their fellow 'digital' DJs. In addition, the layout of the all-metal bodied TWELVE is so familiar, that any DJ who's used a turntable before will feel instantly at home. The control elements are simplicity itself to use, with 4 deck-select buttons and the multi-function touch strip for track searching and setting/triggering hot cues, in place of the tone arm.

Both an evolution and a revolutionary movement in DJ turntable technology, the TWELVE motorized DJ control system is without doubt, RANEvolutionary!

Product Features

- NEW – Full 12-inch all-new black acrylic control disc with grooves
- NEW – Quick release spindle adapter
- NEW – Recessed panel to allow for club or battle style mixing
- Traditional, familiar turntable layout—no need to learn something new
