

REVERB REDISCOVERED

M3000
STUDIO REVERB PROCESSOR

Beginning in 1996 TC Electronic undertook an in-depth study into the re-creation of acoustic environments. The outcome of this extensive research resulted in the creation of VSS technology - the most dense and natural acoustic environment simulation ever. Nothing short of astounding!

Ultimate Realism

Setting the new industry standard with the VSS3 technology, the M3000 is the best sounding, most versatile and easiest to use professional reverb today and well into the future. Combining ultimate control of early reflections with a transparent and harmonically magnificent reverb tail, the art of reverberation is brought to a new and higher level.

Trust your own ears - they will tell you the rest of the story!

Main Features:

- ◆ VSS™3 technology
- ◆ Based on TC's award-winning Dual Engine processing
- ◆ 250 high-grade factory preset-algorithms:
 - Halls, Rooms, Plates and Springs
 - Ambience, Concert Halls
 - Post Small, Post Large, Post Outdoor, Post FX
- ◆ Up to 200 user presets
- ◆ Intuitive user interface with instant preset recall
- ◆ Soft Compressor
- ◆ Advanced Expander and Dynamic EQ
- ◆ De-esser
- ◆ Chorus/Flanger
- ◆ Tremolo
- ◆ Phaser
- ◆ Delay
- ◆ Pitch Shift
- ◆ 5 band parametric EQ
