LDTOUCH ULTI

Our most powerful unit. 1024 DMX channels, independent control of up to 5 areas and touch sensitive buttons to control it all. Trigger your sequences with RS232, dry contact ports, or date/time. Connect with ethernet to control with your smartphone or tablet.

Main Features

Patch Manager : Add lighting fixtures in a few seconds.

Stand Alone Mode : Save your created sequences into the unit's memory and have them play back in any order. Depending on hardware, you can trigger sequences using the internal clock, RS232 or dry contact ports.

Effects Generator : From simple movements to stunning RGB effects, or playing video on an RGB Matrix; creating advanced effects is a breeze.

Profile Editor : Create personalities for your lighting fixtures using the Scanlibrary editor to help make programming quicker and easier.
