

IQ Series® X-style Keyboard Stand with Patented Memory Lock System

IQ-X-2000 & IQ-X-1000

IQ-X Stands bring all the features and rigid strength of our original IQ series stands to a tighter form factor. We've reduced the depth, based on user feedback, while keeping all the same great features users love about the series. Ultimate Support's patented Memory Lock system and unique stabilizing end caps offer keyboardists time saving onstage luxuries, along with peace of mind. IQ-X Series® stands are ideal for supporting everything from lightweight synthesizers and MIDI controllers to the heaviest of professional keyboard workstations.

Pedal &
Seating
Space

Plenty of Legroom

IQ Stands offer a range of height settings for comfort in use while sitting or standing, with plenty of room underneath for pedals.

Memory Lock

The patented Memory Lock system makes setup easy and quick. Set the width for your keyboard stand, the stand will open up to that width every time.

Stabilizing End Caps

There are two stabilizing end caps. These caps allow the musician to adjust the stand on uneven surfaces.

Second Tier
Not Included

Optional Folding Second Tier

An optional second tier is available for the IQ-X-1000 and the IQ-X-2000. The IQ-X-200 second tier is designed to fold up with your stand for easy transport and storage. The IQ-X-200 is also backwards compatible with older IQ stands from Ultimate Support.
