

Original Series Speaker Pole SP-80

The new SP-80 speaker poles feature an expanding cylinder system that will firmly fit multiple speaker sockets from 1-3/8" to 1-1/2" diameter. Using a 2mm hex wrench, the adapter can also be removed to provide standard M20 threading, allowing your SP-80 speaker pole to be a truly universal solution.

Adjustable Speaker Adapter

The top of the speaker pole has an adapter that fits both a 1.5" & 1.375" speaker mount.

Universal Subwoofer Adapter

The bottom of the speaker pole has a universal fit adapter & threaded connector

Die-Cast Fittings

Strong die-cast fittings are found throughout the pole and help support key components like the telescoping tube.

Over-Size Tubing

Our speaker poles are made with over-sized tubing for greater strength and dependability.
