SAFFTY

The lightning flash with arrow head within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Please follow all warnings, precautions and maintenance as recommended in this user's guide.

Important Safety Instruction

- Do not block any ventilation openings. To ensure reliable operation of the projector and to protect from over heating, it is recommended to install the projector in a location that does not block ventilation. As an example, do not place the projector on a crowded coffee table, sofa, bed, etc. Do not put the projector in an enclosure such as a book case or a cabinet that restricts air flow.
- To reduce the risk of fire and/or electric shock, do not expose the projector to rain or moisture. Do not install near heat sources such as radiators, heaters, stoves or any other apparatus such as amplifiers that emits heat.
- Do not let objects or liquids enter the projector. They may touch dangerous voltage points and short out parts that could result in fire or electric shock.
- Do not use under the following conditions:
 - In extremely hot, cold or humid environments.
 - (i) Ensure that the ambient room temperature is within 5° C ~ 40° C
 - (ii) Relative humidity is 10% ~ 85%
 - In areas susceptible to excessive dust and dirt.
 - Near any appliance generating a strong magnetic field.
 - In direct sunlight.
- Do not use the projector in places where flammable gases or explosives gases may be present in the atmosphere. The lamp inside the projector becomes very hot during operation and the gases may ignite and result in a fire.
- Do not use the unit if it has been physically damaged or abused. Physical damage/abuse would be (but not limited to):
 - Unit has been dropped.
 - Power supply cord or plug has been damaged.
 - Liquid has been spilled on to the projector.
 - Projector has been exposed to rain or moisture.
 - Something has fallen in the projector or something is loose inside.
- Do not place the projector on an unstable surface. The projector may fall over resulting in injury or the projector may become damaged.
- Do not block the light coming out of the projector lens when in operation. The light will heat the object and may melt, cause burns or start a fire.
- Please do not open or disassemble the projector as this may cause electric shock.
- Do not attempt to service the unit yourself. Opening or removing covers may expose you to dangerous voltages or other hazards. Please call Optoma before you send the unit for repair.
- See projector enclosure for safety related markings.
- The unit should only be repaired by authorized service personnel.

- Only use attachments/accessories specified by the manufacturer.
- Do not look into straight into the projector lens during operation. The bright light may harm your eyes.
- This projector will detect the life of the lamp itself.
- When switching the projector off, please ensure the cooling cycle has been completed before disconnecting power. Allow 90 seconds for the projector to cool down.
- Turn off and unplug the power plug from the AC outlet before cleaning the product.
- Use a soft dry cloth with mild detergent to clean the display housing. Do not use abrasive cleaners, waxes or solvents to clean the unit.
- Disconnect the power plug from AC outlet if the product is not being used for a long period of time.
- Do not setup the projector in places where it might be subjected to vibration or shock.
- Do not touch the lens with bare hands.
- Remove battery/batteries from remote control before storage. If the battery/batteries are left in the remote for long periods, they may leak.
- Do not use or store the projector in places where smoke from oil or cigarettes may be present, as it can adversely affect the quality of the projector performance.
- Please follow the correct projector orientation installation as non standard installation may affect the projector performance.
- Use a power strip and or surge protector. As power outages and brown-outs can KILL devices.

Laser Radiation Safety Information

This product is classified as Class 3R of IEC60825-1: 2007 and also complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007.
 IEC 60825-1:2014: CLASS 1 LASER PRODUCT - RISK GROUP 2

Explanatory label is shown all information of laser power.

- CLASS 3R LASER PRODUCT-AVOID DIRECT EYE EXPOSURE.
- Laser aperture is from projection lens, DO NOT LOOK INTO THE LENS.

- This projector has built-in Class 4 laser module. Disassembly or modification is very dangerous and should never be attempted.
- Any operation or adjustment not specifically instructed by the user manual creates the risk of hazardous laser radiation exposure.
- Do not open or disassemble the projector as this may cause damage by the exposure of laser radiation.
- Do not stare into beam when the projector is on. The bright light may result in permanent eye damage.
- When turning on the projector, make sure no one within projection range is looking at the lens.
- Without following the control, adjustment or operation procedure may cause damage by the exposure
 of laser radiation.

Adequate instructions for assembly, operation, and maintenance, including clear warnings concerning precautions to avoid possible exposure to laser and collateral radiation in excess of the accessible emission limits in Class 3R.

Trademark Recognition

Kensington is a U.S. registered trademark of ACCO Brand Corporation with issued registrations and pending applications in other countries throughout the world.

HDMI, the HDMI Logo, and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

DLP®, DLP Link and the DLP logo are registered trademarks of Texas Instruments and BrilliantColor™ is a trademark of Texas Instruments.

All other product names used in this manual are the properties of their respective owners and are Acknowledged.

FCC

This device has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

Notice: Shielded cables

All connections to other computing devices must be made using shielded cables to maintain compliance with FCC regulations.

Caution

Changes or modifications not expressly approved by the manufacturer could void the user's authority, which is granted by the Federal Communications Commission, to operate this projector.

Operation Conditions

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference and
- 2. This device must accept any interference received, including interference that may cause undesired operation.

Notice: Canadian users

This Class A digital apparatus complies with Canadian ICES-003.

Remarque à l'intention des utilisateurs canadiens

Cet appareil numerique de la classe A est conforme a la norme NMB-003 du Canada.

Declaration of Conformity for EU countries

- EMC Directive 2004/108/EC (including amendments)
- Low Voltage Directive 2006/95/EC
- R & TTE Directive 1999/5/EC (if product has RF function)

WEEE

Disposal instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure utmost protection of the global environment, please recycle it.

Package Overview

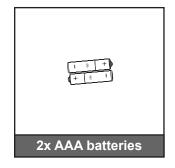

Carefully unpack and verify that you have the items listed below under standard accessories. Some of the items under optional accessories may not be available depending on the model, specification and your region of purchase. Please check with your place of purchase. Some accessories may vary from region to region.

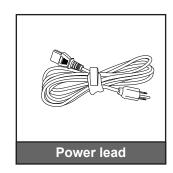

The warranty card is only supplied in some specific regions. Please consult your dealer for detailed information.

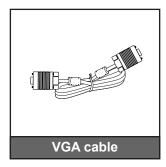

Standard accessories

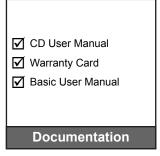

Optional accessories

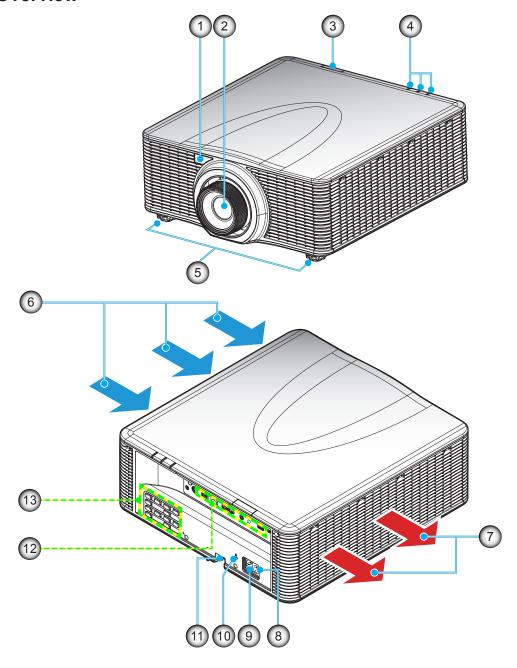

Note: Optional accessories vary depending on model, specification and region.

Installing the projection lens

Before setting up the projector, install the projection lens on the projector.

在安装或替换镜头前,关掉投影机的电源。

在镜头安装联接过程中,避免使用遥控器或投影机按键板的按钮 调节侧平移镜头或缩放/聚焦。

Before install or replacing the lens, switch off the power to the projector.

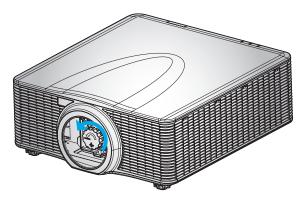

Avoid using the remote control or projector keypad button to adjust the lens shift or zoom/focus while the lens attachment process is carried out.

IMPORTANT!

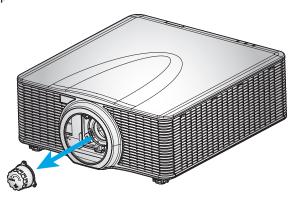

- Make sure the projector is properly turned off before installing the lens.
- During lens installation, do not adjust the lens shift, zoom, or focus either using the remote control or the projector keypad.

Procedure:

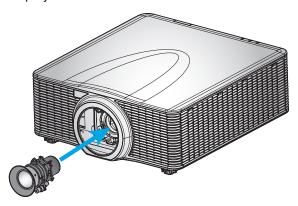

1. Rotate the lens cap counterclockwise.

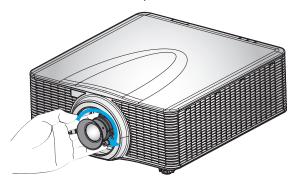

2. Remove the lens cap.

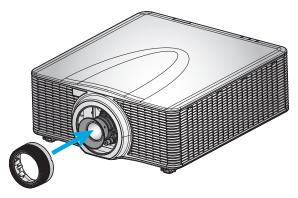

3. Install the lens onto the projector.

4. Rotate the lens clockwise to lock the lens in place.

5. Firmly install the lens ring onto the lens.

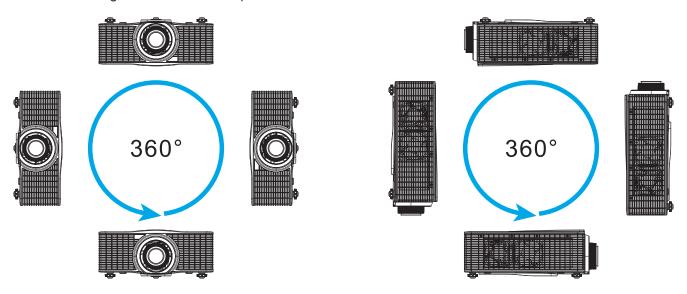

Note: The lens rings are compatible with the following lens modules: A01 (0.95-1.22), A06 (1.22-1.52), A03 (1.53-2.92), and A13 (2.90-5.50).

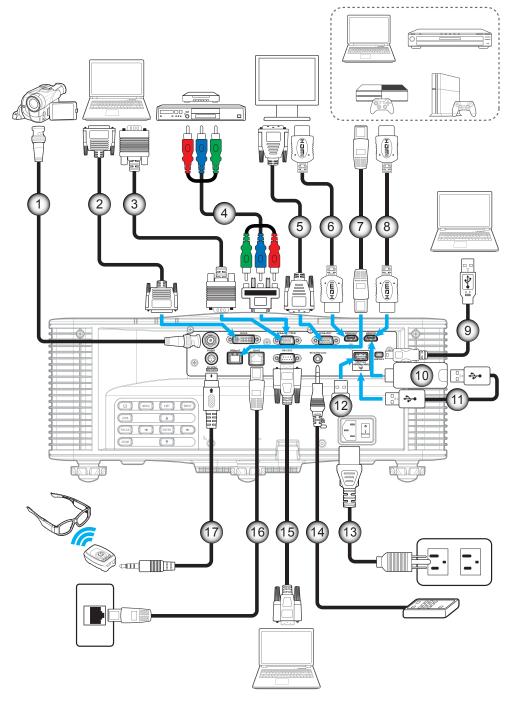

Adjusting the projector position

When you select a position for the projector, consider the size and shape of your screen, the location of your power outlets, and the distance between the projector and the rest of your equipment. Follow these general guidelines:

- Position the projector on a flat surface at a right angle to the screen. The projector (with the standard lens) must be at least 3 feet (0.9m) from the projection screen.
- Position the projector to the desired distance from the screen. The distance from the lens of the projector to the screen, the zoom setting, and the video format determine the size of the projected image.
- For the fixed short lens, the image exits at a default angle. However, the lens shift feature makes the image offset variable.
- 360 degree free orientation operation

Connecting sources to the projector

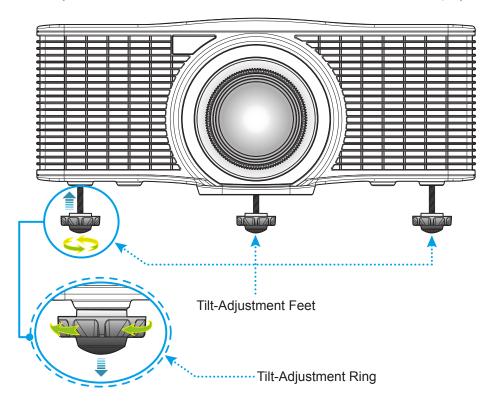

No	Item	No	Item	
1.	BNC Cable	10.	HDMI Dongle	
2.	DVI-D Cable	11. USB Power Cable		
3.	VGA-In Cable	12. Wireless (Wi-Fi) Dongle		
4.	RCA Component Cable	13.	Power Cord	
5.	VGA-Out Cable	14.	Wired Remote-In Cable (~30m)	
6.	HDMI Cable	15.	RS-232C Cable	
7.	CAT5e/6/6A Cable	16.	RJ-45 Cable	
8.	HDMI Cable	17.	3D Emitter Cable	
9.	USB Cable (mouse control)			

Adjusting the projector image

Image height

The projector is equipped with elevator feet for adjusting the image height.

- 1. Locate the adjustable foot you wish to adjust on the underside of the projector.
- 2. Rotate the adjustable foot clockwise or counterclockwise to raise or lower the projector.

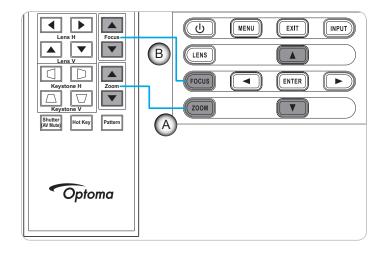

The feet of projector are not removable. Please do not screw out the feet of projector. The adjustable height of the elevator feet could be raised up to 45mm.

Zoom and focus

- To adjust the image size, press the **Zoom** button ((A)) to increase or decrease the projected image
- To adjust the focus, press the **Focus** button (B) until the image is sharp and legible.

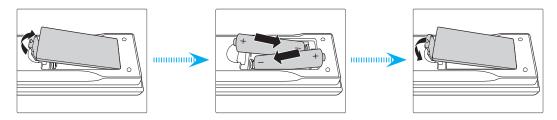

Remote setup

Installing / replacing the batteries

Two AAA size batteries are supplied for the remote control.

- 1. Remove the battery cover on the back of the remote control.
- 2. Insert AAA batteries in the battery compartment as illustrated.
- 3. Replace back cover on remote control.

Note: Replace only with the same or equivalent type batteries.

CAUTION

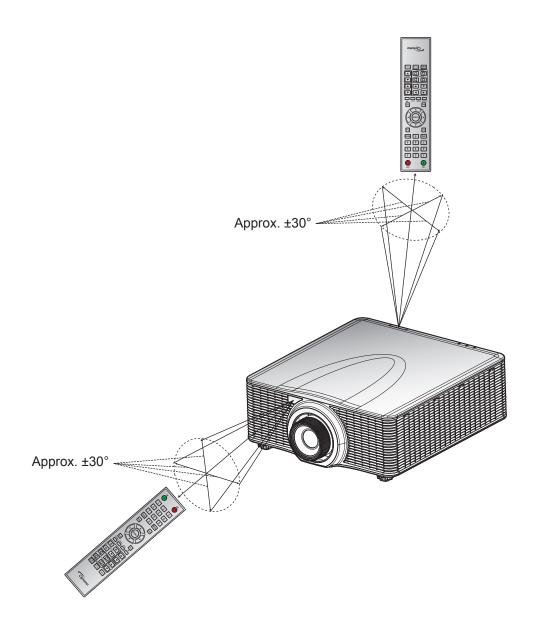

Improper use of batteries can result in chemical leakage or explosion. Be sure to follow the instructions below.

- Do not mix batteries of different types. Different types of batteries have different characteristics.
- Do not mix old and new batteries. Mixing old and new batteries can shorten the life of new batteries or cause chemical leakage in old batteries.
- Remove batteries as soon as the are depleted. Chemicals that leak from batteries that come in contact with skin can cause a rash. If you find any chemical leakage, wipe thoroughly with a cloth.
- The batteries supplied with this product may have a shorter life expectancy due to storage conditions.
- If you will not be using the remote control for an extended period of time, remove the batteries.
- When you dispose of the batteries, you must obey the law in the relative area or country.

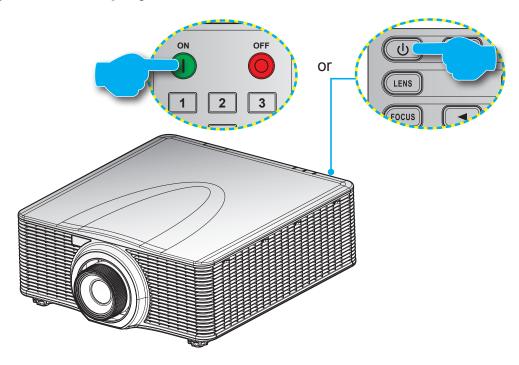

Effective range

Infra-Red (IR) remote control sensors are located on the front and top sides of the projector. Ensure to hold the remote control at an angle within $\pm 30^{\circ}$ (horizontally or vertically) to the projector's IR remote control sensor to function correctly. The distance between the remote control and the sensor should not be longer than 10 meters (32.8 feet).

- Make sure that there are no obstacles between the remote control and the IR sensor on the projector that might obstruct the infra-red beam.
- Make sure the IR transmitter of the remote control is not being shined by sunlight or fluorescent lamps directly.
- Please keep the remote controller away from fluorescent lamps for over 2 m or the remote controller might become malfunction.
- If the remote control is closed to Inverter-Type fluorescent lamps, it might become ineffective from time to time.
- If the remote control and the projector are within a very short distance, the remote control might become ineffective.
- When you aim at the screen, the effective distance is less than 5 m from the remote control to the screen and reflecting the IR beams back to the projector. However, the effective range might change according to screens.

Powering on / off the projector

Powering on

- 1. Securely connect the power lead and signal/source cable.
- 2. Set the **Power** switch to the "ON" position.
- 3. Turn on the projector by pressing "• on the remote control or pressing "• on the projector keypad. The Status LED is Orange with a long blink.

Note: The first time the projector is turned on, you will be prompted to select the preferred language, projection orientation, and other settings.

Powering off

1. Turn off the projector by pressing "🕩" on the projector keypad or pressing "🕌" on the remote control. A warning message will appear on the displayed image.

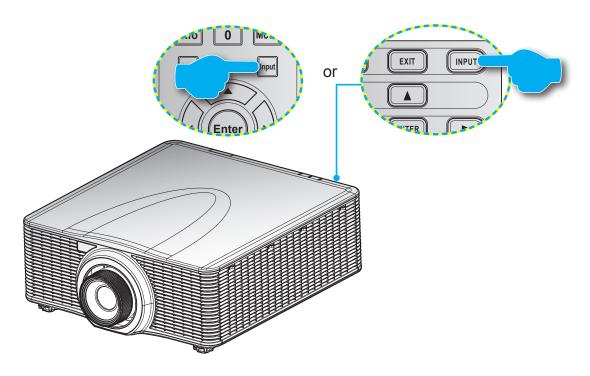

- 2. Press "**U**" on the projector keypad or press "**O**" on the remote control again to confirm, otherwise the warning message will disappear after 10 seconds. When you press "**U**" on the projector keypad or press "**O**" on the remote control for the second time, the projector will shut down.
- 3. Set the **Power** switch to the "OFF" position.
- 4. Disconnect the power lead from the electrical outlet and the projector.

Note: It is not recommended that the projector is turned on immediately, right after a power off procedure.

Selecting an input source

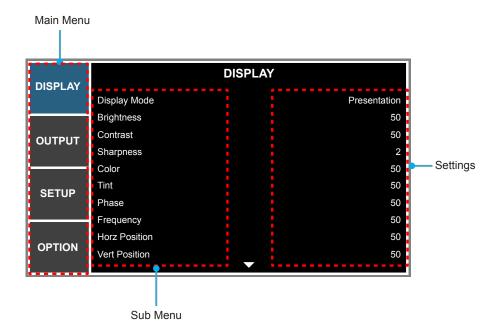

Turn on the connected source that you want to display on the screen, such as computer, notebook, video player, etc. The projector will automatically detect the source. If multiple sources are connected, press the Input button on the projector keypad or the remote control to select the desired input.

Menu navigation and features

The projector has multilingual on-screen display menus that allow you to make image adjustments and change a variety of settings. The projector will automatically detect the source.

- 1. To open the OSD menu, press "Menu" on the remote control or the projector keypad.
- 2. When OSD is displayed, use ▲▼◀▶ to navigate within the menu and adjust a setting up or down.
- 3. Press "Enter" to enter the submenu or confirm the selection/setting.
- 4. Press "Exit" to return to the previous menu or exit menus if at top level.

DISPLAY (1/2)

DISPLAY (2/2)

Display Mode

There are many factory presets optimized for various types of images.

- **Presentation**: This mode is suitable for showing PowerPoint presentations when the projector is connected to the PC.
- Movie: This mode is suitable for watching movie.
- Bright: Maximum brightness from PC input.
- REC709: This color mode matches the REC.709 color standard as closely as possible.
- DICOM SIM: This mode offer medical educators and training professionals the ability to display medical images.
- **2D High Speed**: Display the status of 2D High Speed mode (This mode should not be used for medical diagnosis).

Note: If the resolution of the input source is 800x600 at 120Hz, 1024x768 at 120Hz, or 1280x720 120Hz, then the display mode will automatically switch to 2D High Speed.

- **3D**: Recommended setting for 3D mode enabled. Any further adjustments by the user in 3D will be saved in this mode for further use.
- **Blending**: When using multiple projectors, this mode can eliminate the visible banding and create a single bright, high resolution image across the screen.
- User: Memorize user's settings. Any adjustment in this mode will be automatically saved.
- Save to User: Save the current display mode settings in user profile.

Brightness

Adjust the brightness of the image.

Contrast

The contrast controls the degree of difference between the lightest and darkest parts of the picture.

Sharpness

Adjust the sharpness of the image.

Color

Adjust a video image from black and white to fully saturated color.

Tint

Adjust the color balance of red and green.

Phase

Synchronize the signal timing of the display with the graphic card. If the image appears to be unstable or flickers, use this function to correct it.

Frequency

Change the display data frequency to match the frequency of your computer's graphic card. Use this function only if the image appears flickering vertical lines.

Horz Position

Move the image right or left within the area of available pixels.

Vert Position

Move the image up or down within the area of available pixels.

3D

Configure the 3D display settings. Refer to "3D menu" on page 32.

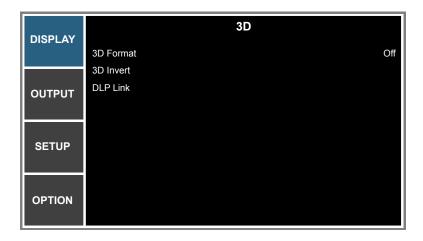

Color Matching

Configure the color management settings. Refer to "Color Matching menu" on page 33.

Advanced

Configure the advanced image settings. Refer to "Advanced menu" on page 34.

3D menu

3D Format

Set 3D format. Supports Mandatory 3D formats and frame sequential 3D@120Hz.

- Auto: When a 3D identification signal is detected, the 3D format is selected automatically.
- Frame Packing: Display 3D signal in "Frame Packing" format.
- Side by Side: Display 3D signal in "Side by Side" format.
- Top and Bottom: Display 3D signal in "Top and Bottom" format.
- Frame Sequential: Display 3D signal in "Frame Sequential" format.
- Off: Disable the function.

3D Invert

Choose to enable or disable inverting 3D sync signal for the application of using single projector.

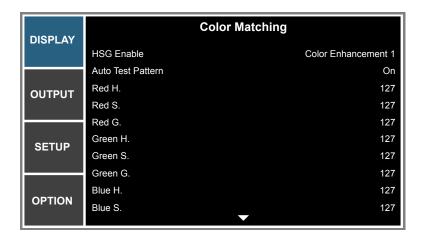

- On: Invert the left and right frame contents.
- Off: Display the default frame contents.

DLP Link

Select 3D Sync source.

- On: 3D Sync type is DLP Link.
- Off: 3D Sync source is from the 3D Sync OUT connector.

Color Matching menu

HSG Enable

The HSG adjustment function has 4 Color Enhancement settings: Off, Color Enhancement 1, Color Enhancement 2, and User.

Only the **User** option can be customized for the desired color. Other settings have their own fixed color settings.

Auto Test Pattern

Set to "On" to display a test pattern for the target color or set to "Off" to disable the auto test pattern.

Red H. / Green H. / Blue H. / Cyan H. / Magenta H. / Yellow H.

Adjust the hue of the red, green, blue, cyan, magenta, or yellow channel of the image.

Red S. / Green S. / Blue S. / Cyan S. / Magenta S. / Yellow S.

Adjust the saturation of the red, green, blue, cyan, magenta, or yellow channel of the image.

Red G. / Green G. / Blue G. / Cyan G. / Magenta G. / Yellow G.

Adjust the gain of the red, green, blue, cyan, magenta, or yellow channel of the image.

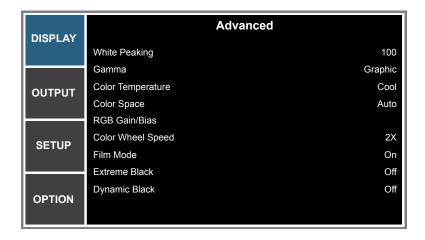

White R Gain / White G Gain / White B Gain

Adjust the white balance of the red, green, or blue channel of the image.

Reset to Default

Reset the hue, saturation, gain, and white balance adjustments to the factory defaults.

Advanced menu

White Peaking

(Video source only) Increase the brightness of whites that are near 100%.

Gamma

This allows you to set up gamma curve type. After the initial setup and fine tuning is completed, utilize the Gamma adjustment steps to optimize your image output.

- Video: for video or TV source.
- Film: for home theater.
- Blackboard: for emphasizing brightness.
- Graphic: for computer source or RGB source.
- DICOM: independent gamma setting of the display mode for DICOM SIM.
- Gamma 2.2: independent gamma setting of the display mode for Blending.

Color Temperature

Select a color temperature from Warm, Medium, Cool, or Cold.

Color Space

Select an appropriate color matrix type from RGB, REC709, REC601, RGB Video, or Auto.

RGB Gain/Bias

Configure the brightness (gain) and contrast (offset) of an image.

- Red Gain/Green Gain/Blue Gain/Red Offset/Green Offset/Blue Offset: Adjust the gain of the red, green, or blue channel of the image. Adjust the offset of the red, green, or blue channel of the image. It will affect the black and white.
- Reset RGB Gain/Offset: Reset the gain and offset adjustments to the factory defaults.

Color Wheel Speed

Adjust the wheel speed.

- **2X**: provides quieter sound and longer life.
- **3X**: provides better color performance.

Film Mode

Control film mode detection and determine whether the original source of the input video was film or video.

Note: This function is available for interlaced video signals.

Extreme Black

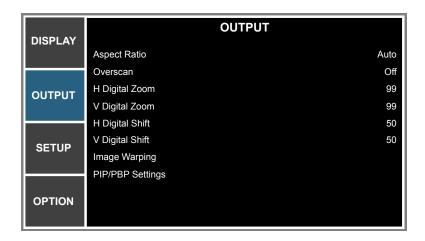

Contrast can be increased when a blank (black) image is displayed. Select "On" and the projector will automatically improve contrast or select "Off" to disable this function.

Dynamic Black

Contrast can be dynamically increased when viewing gray or dark content. Select "On" to let the projector automatically improve contrast or select "Off" to disable this function.

Only Extreme Black or Dynamic Black can be enabled simultaneously.

OUTPUT menu

Aspect Ratio

Choose your desired aspect ratio.

- **Auto**: Automatically selects the appropriate display format.
- 4:3: This format is for 4:3 input sources.
- **16:9**: This format is for 16:9 input sources.
- 16:10: This format is for 16:10 aspect input sources, like HDTV and DVD enhanced for Wide screen
- Native: This format displays the original image without any scaling.

Overscan

Remove noise around the image.

H Digital Zoom

Change the size of projector's display area horizontally. If the display area has been resized by this setting, it can be moved by changing the H Digital Shift and V Digital Shift settings.

V Digital Zoom

Change the size of projector's display area vertically. If the display area has been resized by this setting, it can be moved by changing the H Digital Shift and V Digital Shift settings.

H Digital Shift

Shift the display area horizontally if its size has been changed by the Digital Zoom setting.

V Digital Shift

Shift the display area vertically if its size has been changed by the Digital Zoom setting.

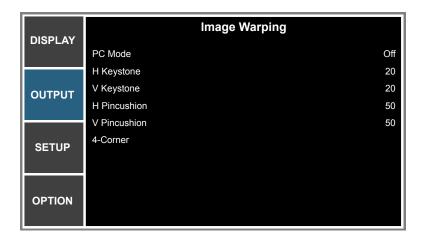

Image Warping

Configure the image warping settings. Refer to "Image Warping menu" on page 36.

PIP/PBP Settings

Configure the PIP/PBP settings. Refer to "PIP/PBP Settings menu" on page 37.

Image Warping menu

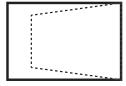

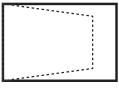

PC Mode

Enable PC software to control advanced geometry using multi-point grid adjustment.

H Keystone

Adjust image distortion horizontally and make a squarer image. Horizontal keystone is used to correct a keystoned image shape in which the left and right borders of the image are unequal in length. This is intended for use with horizontally on-axis applications.

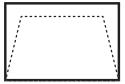

V Keystone

Adjust image distortion vertically and make a squarer image. Vertical keystone is used to correct a keystoned image shape in which the top and bottom are slanted to one of the sides. This is intended when for use with vertically on-axis applications.

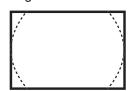

H Pincushion

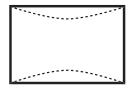

Adjust the pincushion horizontally and make a more square image.

V Pincushion

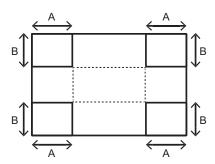

Adjust the pincushion vertically and make a more square image.

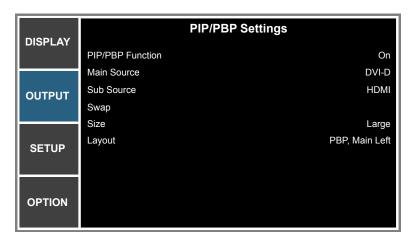

4-Corner

Allow the image to be squeezed to fit an area defined by moving each of the four corners' x and y position.

PIP/PBP Settings menu

PIP/PBP Function

Toggle between displaying two sources at once (Main and PIP/PBP images) or one source only.

Main Source

From the list of active inputs, select one to be used as the main image.

Sub Source

From the list of active inputs, select one to be used as the sub image.

Swap the sources of main window and PIP/PBP window.

<u>Size</u>

Select the PIP/PBP size.

Layout

Set the location of the PIP/PBP image on the screen.

PIP/PBP Matrix

PIP/PBP compatibility table as described below:

PIP/PBP Matrix	HDMI	Network Display	HDBaseT	3G-SDI	VGA	DVI-D
HDMI	_	_	_	V	V	V
Network Display	_	_	_	V	V	V
HDBaseT	_	_	_	V	V	V
3G-SDI	V	V	V	_	_	_
VGA	V	V	V	_	_	_
DVI-D	V	V	V	_	_	_

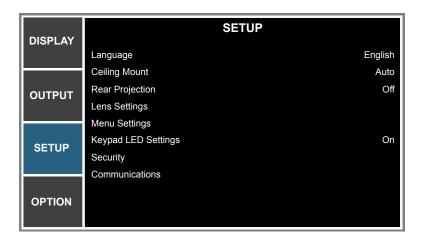

Note:

- 1. Flashing lines may occur if the bandwidth of both inputs are too high, please try to reduce the resolution.
- 2. Frame tearing may occur due to a difference in frame rate between the Main and the Sub picture, please try to match the frame rate for each input.

PIP/PBP layout and size table as described below:

DID/DDD It		PIP/PBP Size	
PIP/PBP Layout	Small	Medium	Large
PBP, Main Left	Р	Р	Р
PBP, Main Top	P	P	P
PBP, Main Right	Р	Р	Р
PBP, Main Bottom	P	P	P
PIP-Bottom Right	Р	Р	Р
PIP-Bottom Left	P	P	P
PIP-Top Left	Р	Р	P
PIP-Top Right	Р	Р	P

SETUP menu

Language

Choose the multilingual OSD menu.

Ceiling Mount

Turn the image upside down for ceiling-mounted projection.

Rear Projection

Reverse the image so you can project from behind a translucent screen.

Lens Settings

Configure the lens function settings. Refer to "Lens Settings menu" on page 40.

Menu Settings

Configure the menu preferences settings. Refer to "Menu Settings menu" on page 41.

Keypad LED Settings

Turn the backlight of keypad on or off.

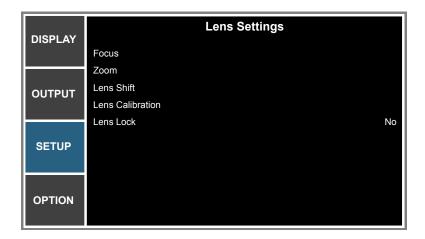

Security

Configure the security settings. Refer to "Security menu" on page 41.

Communications

Configure the communications settings. Refer to "Communications menu" on page 42.

Lens Settings menu

Focus

Adjust focus function on the projected image.

Zoom

Adjust zoom function on the projected image.

Lens Shift

Shift the projected image.

Lens Calibration

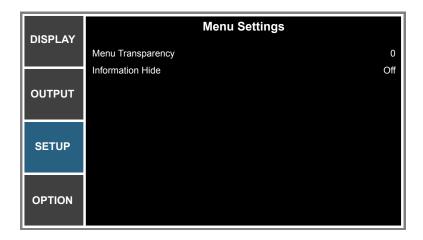

Perform calibration and return lens to the center position.

Lens Lock

Select this function to prevent all lens motors from moving.

- No: Lens shift can be used by user.
- Yes: Lens shift will be locked.

Menu Settings menu

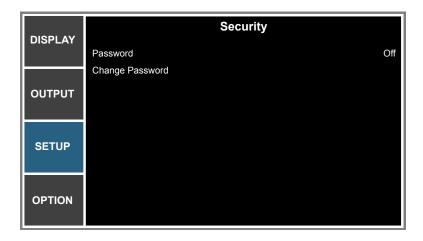

Menu Transparency

Change OSD menu background to be transparent.

Information Hide

Enable this function to hide the information message.

Security menu

Password

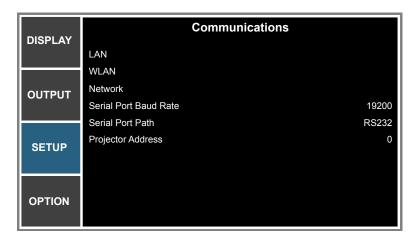

The Security feature allows you to password protect your projector. Once you enable the Security feature, you must enter the password before you can project an image.

Note: The password default value is "12345".

Change Password

Change the password.

Communications menu

LAN

Configure the local area network (LAN) settings.

- DHCP: Turn the DHCP ON/OFF.
- IP Address: Select an IP address.
- Subnet Mask: Select subnet mask number.
- Gateway: Select the default gateway of the network connected to the projector.
- MAC Address: Display the network MAC Address value.
- Apply: Apply Network settings.

WLAN

Configure the wireless local area network (WLAN) settings.

- Enable: Enable/Disable WLAN.
- Start IP: Start of IP Address.
- End IP: End of IP Address.
- Subnet Mask: Assign Network Subnet Mask.
- Gateway: Assign Network Default Gateway.
- MAC Address: Display network MAC Address value.
- SSID: Assign Network Service Set Identifier.

Network

Configure the general network settings.

- Projector Name: Display the projector hostname for Network.
- Restart Network: Restart the network.
- Network Factory Reset: Perform factory reset on the network settings. The Projector Name, LAN IP, WLAN IP, and SNMP settings will be reset

Serial Port Baud Rate

Select the serial port its baud rate.

Serial Port Path

Select the serial port path from either RS232 or HDBaseT.

Projector Address

Set the projector address. The projector will respond to IR remotes set either at the same address as the projector or to IR remotes set to address 0.

How to use web browser to control your projector

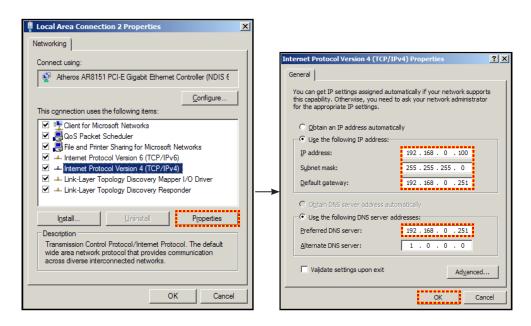

- 1. Turn "On" the DHCP option on projector to allow a DHCP server to automatically assign an IP address.
- Open the web browser in your PC and type in the projector's IP address ("SETUP: Communications > 2. LAN > IP Address").

Note: The steps in this section is based on Windows 7 operating system.

Making a direct connection from your computer to the projector* (For Windows 7 or higher)

- Turn "Off" the DHCP option on the projector. 1.
- Configure the IP address, Subnet Mask, and Gateway on projector. Refer to "Communications menu" 2. on page 42.
- 3. Open Network and Sharing Center page on your PC, and assign the identical network parameters to your PC as set on projector. Click "OK" to save the parameters.

Note: The last group (ex: 100) of the IP address should be different from the projector. Make sure the network parameters (i.e. other groups of the IP address and the Subnet mask) are similar to those shown in the OSD menu.

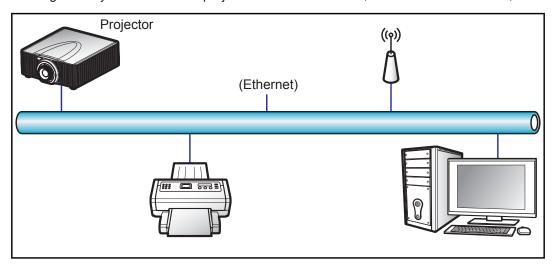

4. Open the web browser on your computer and type the projector IP address into the URL field, then press "Enter".

Setup network control settings menu

LAN RJ45 function

For simplicity and ease of operation, the projector provides diverse networking and remote management features. The LAN / RJ45 function of the projector through a network, such as remotely manage: Power On / Off, Brightness and Contrast settings. Also you can view the projector status information, such as: Video- Source, etc.

Wired LAN terminal functionalities

This projector can be controlled by using a PC (laptop) or other external device via LAN connector and compatible ith Crestron / Extron / AMX (Device Discovery) / PJLink.

- Crestron is a registered trademark of Crestron Electronics, Inc. of the United States.
- Extron is a registered trademark of Extron Electronics, Inc. of the United States.
- AMX is a registered trademark of AMX LLC of the United States.
- PJLink applied for trademark and logo registration in Japan, the United States of America, and other countries by JBMIA.

The projector is supported by the specified commands of the Crestron Electronics controller and related software, for example RoomView[®].

http://www.crestron.com/

This projector is compliant to support Extron device(s) for reference.

http://www.extron.com/

This projector is supported by AMX (Device Discovery).

http://www.amx.com/

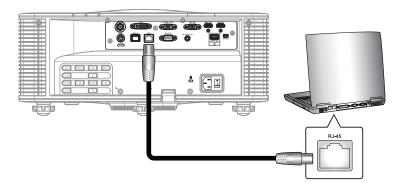

This projector supports all commands of PJLink Class1 (Version 1.00).

http://pjlink.jbmia.or.jp/english/

For more detailed information about the various types of external devices which can be connected to the LAN / RJ45 port and remote control the projector, as well as the supported commands for these external devices, please contact the Support-Service directly.

LAN RJ45 (For Windows XP)

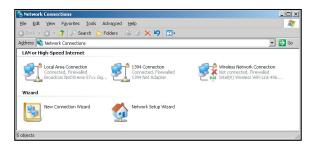

1. Connect an RJ45 cable to LAN connector on the projector and the PC (laptop).

2. On the PC (Laptop), select Start > Control Panel > Network Connections.

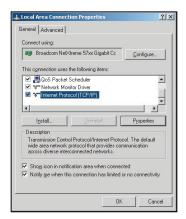

Right-click on the Local Area Connection, and select Property. 3.

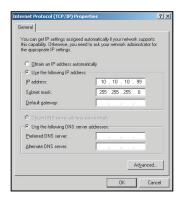

4. In the Properties window, select the General tab, and select Internet Protocol (TCP / IP).

5. Click "Properties".

6. Type in the IP address and Subnet mask, then press "OK".

- 7. Press the "Menu" button on the projector.
- 8. Select **SETUP > Communications > LAN**.
- 9. Enter the following connection parameters:
 - DHCP: Off
 - IP Address: 10.10.10.10
 - Subnet Mask: 255.255.255.0
 - Default Gateway: 0.0.0.0
- 10. Press "Enter" to confirm settings.
- 11. Open a web browser, for example Microsoft Internet Explorer with Adobe Flash Player 9.0 or higher installed.
- 12. In the Address bar, input the projector's IP address: 10.10.10.10.

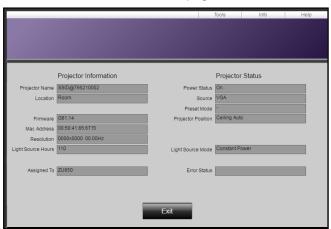

Press "Enter". 13.

The projector is setup for remote management. The LAN / RJ45 function displays as follows:

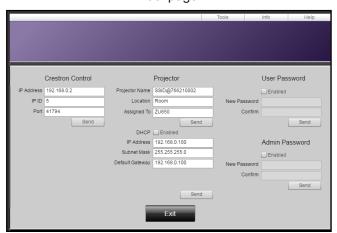

Main page

Information page

Tool page

Contact IT helpdesk

RS232 by Telnet Function

There is alternative RS232 command control way, in projector so called "RS232 by TELNET" for LAN / RJ45 interface.

Quick Start-Guide for "RS232 by Telnet"

- Check and get the IP address on OSD of the projector.
- Make sure that the PC / laptop can access the web-page of the projector.
- Make sure that "Windows Firewall" setting is set disabled in case of "TELNET" function filtering out by PC / laptop.

Select Start > All Programs. > Accessories > Command Prompt.

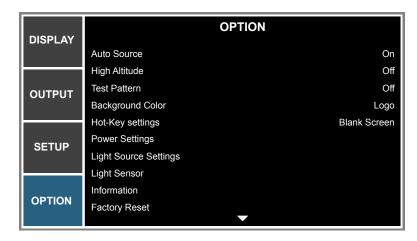

- 2. Input the command format as follows:
 - telnet ttt.xxx.yyy.zzz 3023 ("Enter" key pressed)
 - (ttt.xxx.yyy.zzz: IP-Address of the projector)
- 3. If Telnet-Connection ready, and user can have RS232 command input, then "Enter" key pressed, the RS232 command will be workable.

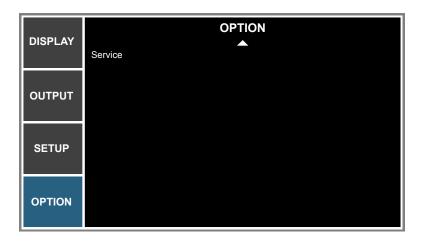

Specification for "RS232 by TELNET":

- 1. Telnet: TCP.
- 2. Telnet port: 3023 (for more detail, kindly please get contact with the service agent or team).
- 3. Telnet utility: Windows "TELNET.exe" (console mode).
- 4. Disconnection for RS232-by-Telnet control normally: Close
- Windows Telnet utility directly after TELNET connection ready.
 - Limitation 1 for Telnet-Control: there is less than 50 bytes for successive network payload for Telnet-Control application.
 - Limitation 2 for Telnet-Control: there is less than 26 bytes for one complete RS232 command for Telnet-Control.
 - Limitation 3 for Telnet-Control: Minimum delay for next RS232 command must be more than 200 (ms).

OPTION menu

OPTION (1/2)

OPTION (2/2)

Auto Source

Use this option to enable/disable input sources.

- On: The projector will search for other signals if the current input signal is lost.
- Off: The projector will only search current input connection.

High Altitude

When "On" is selected, the fans will increase speed. This feature is useful in high altitude locations where the air is thin.

Test Pattern

Display a test pattern or select "Off" to turn off a test pattern.

Background Color

Use this feature to display a "Logo", "Blue", "Black", or "White" screen when no signal is available.

Hot-Key settings

Assign a different function to the hot-key on the remote control by highlighting the function in the list and pressing "Enter". Choose a function that does not already have a dedicated button, and assign the hot-key to that function, allowing you to quickly and easily use the chosen function.

Power Settings

Configure the power settings. Refer to "Power Settings menu" on page 51.

Light Source Settings

Configure the light source settings. Refer to "Light Source Settings menu" on page 52.

Light Sensor

- **Light Sensor Calibration**: Calibrate the Light Sensor for use with the Constant Luminance mode, which allows the projector to be set for constant brightness. If the Light Sensor has not been calibrated, Constant Luminance mode will be disabled.
- Calibrated:
 - Yes: Light Sensor has been calibrated.
 - No: Light Sensor has not been calibrated.

Information

Display the projector information for source, resolution, and software version on the screen.

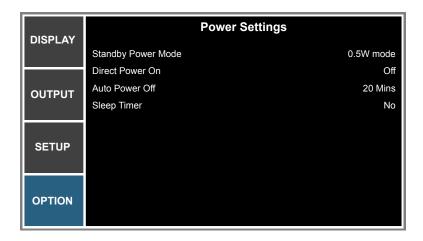

Factory Reset

Restore all settings to their default value. It will not reset network.

Service

Service only.

Power Settings menu

Standby Power Mode

Set the standby power mode setting.

- **0.5W mode**: The projector is in standby mode when connected to AC power. (<0.5W)
- Communication mode: The projector can be controlled via the LAN terminal during power standby.

Direct Power On

Choose "On" to activate Direct Power mode. The projector will automatically power on when AC power is supplied, without pressing "O" on the remote control or press "O" on the projector keypad.

Auto Power Off

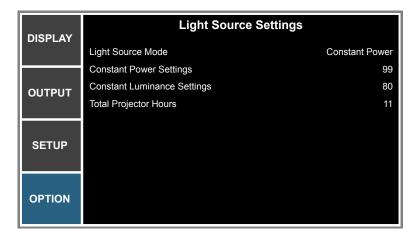

Set the countdown timer interval. The countdown timer will start, when there is no signal being sent to the projector. The projector will automatically power off when the countdown has finished (in minutes).

Sleep Timer

Sets the countdown timer interval. The countdown timer will start, with or without a signal being sent to the projector. The projector will automatically power off when the countdown has finished.

Note: The value of sleep timer will be reset to zero after the projector is powered off.

Light Source Settings menu

Light Source Mode

Set the light source mode setting. When "Eco Mode" is selected, the projector will adjust to the lowest fan speed and switch the laser diode power to the minimum setting.

Constant Power Settings

Set the value of the laser diode power.

Constant Luminance Settings

Set the value for the Constant Luminance Settings to maintain constant brightness. The light sensor will monitor the light level and will apply more power as the laser brightness decays naturally over time. When the laser setting reaches maximum power, it will remain at this setting.

Note: The light sensor needs to be calibrated for Constant Luminance mode to work correctly.

Total Projector Hours

Display the projection time.

Compatible resolutions

Projector dimensions and ceiling mount installation

- To prevent damage to your projector, please use the Optoma ceiling mount.
- 2. If you wish to use a third party ceiling mount kit, please ensure the screws used to attach a mount to the projector meet the following specifications:
- Screw type: M6 x 4
- Minimum screw length: 20mm

Note: Please note that damage resulting from incorrect installation will void the warranty.

- If you buy a ceiling mount from another company, please be sure to use the correct screw size. Screw size will vary depending on the thickness of the mounting plate.
- Be sure to keep at least 30mm (3cm) gap between the ceiling and the bottom of the projector.
- Avoid installing the projector near a heat source.

Troubleshooting

If you experience a problem with your projector, please refer to the following information. If a problem persists, please contact your local reseller or service center.

Image problems

- ? No image appears on-screen
 - Ensure all the cables and power connections are correctly and securely connected as described in the "Installation" section.
 - Ensure the pins of connectors are not crooked or broken.
 - Ensure that the "Shutter (AV Mute)" feature is not turned on.
- ? Image is out of focus
 - Press the Focus ▲ or Focus ▼ button on the remote control to adjust the focus until the image is sharp and legible.
 - Make sure the projection screen is between the required distance from the projector. (Please refer to page 58).
- ? The image is stretched when displaying 16:10 DVD title
 - When you play anamorphic DVD or 16:10 DVD, the projector will show the best image in 16:10 format on projector side.
 - If you play 4:3 format DVD title, please change the format as 4:3 in projector OSD.
 - Please setup the display format as 16:10 (wide) aspect ratio type on your DVD player.
- ? Image is too small or too large
 - Press the **Zoom** ▲ or **Zoom** ▼ button on the remote control to increase or decrease the projected image size.
 - Move the projector closer to or further from the screen.
 - Press "Menu" on the projector panel, go to "OUTPUT-->Aspect Ratio". Try the different settings.
- ? Image has slanted sides:
 - If possible, reposition the projector so that it is centered on the screen and below the bottom of the screen.
 - Use "OUTPUT-->Image Warping-->V Keystone" from the OSD to make an adjustment.
- ? Image is reversed
 - Select "SETUP-->Rear Projection-->On" from the OSD to reverse the image so you can project from behind a translucent screen.

Other problems

- The projector stops responding to all controls
 - If possible, turn off the projector, then unplug the power cord and wait at least 20 seconds before reconnecting power.

Remote control problems

- If the remote control does not work
 - Check the operating angle of the remote control is pointed within ±30° (horizontally or vertically) to the IR receivers on the projector.
 - Make sure there are not any obstructions between the remote control and the projector. Move to within 10 m (32.8 ft) of the projector.
 - Make sure batteries are inserted correctly.
 - Replace batteries if they are exhausted.

Warning indicators

LED status indicators

The LED status indicators are located on the rear of the projector. Each LED is defined below.

Masaaga		Light LED		;	Status LED)	AV Mute LED

Projector communication	Steady	_	_	Flashing	_	_	Steady	_	
Firmware upgrade	_	_	_	Flashing	Flashing	_	_	_	
Laser diode time has expired	_	Steady	_	_	_		_	_	
Unit loses over 60% initial luminance	_	_	Flashing	_	_	_	_	_	
Error (Over temperature)	_	_	_	_	_	Steady	_	_	
Error (Fan failure)	_	_	_	_	_	Flashing	_	_	

Note: Keypad LED (Power Key) will flash in orange for standby mode.

Power off:

Light power impact due to high ambient temperature:

The light power will be reduced due to the high ambient temperature.

DMD life time impact due to high ambient temperature:

Running the projector at high ambient temperature will impact DMD life time.
