Safety Instructions

1. Operation

- 1.1 Use camera in the recommended operating environments.
- 1.2 Do not place the camera in tilted position.
- 1.3 Do not place the product on an unstable cart, stand or table.
- 1.4 Do not use this product near water, extreme humidity or high heat.
- 1.5 Use recommended ¼”-20 mounts and attachments.
- 1.6 Use the power supply that is provided in box.
- 1.7 Always take the following precautions when handling the power plug. Failure to do so may result in sparks, shock or fire:
 - Ensure the plug is free of dust before inserting it into a socket.
 - Ensure that the plug is inserted into the socket completely and securely.
- 1.8 Do not overload wall sockets, use long extension cords, or plug camera into multi-output power strips.
- 1.9 Do not block vents on the camera body as they provide ventilation and prevent the product from overheating.
- 1.10 Do not open or remove camera body, camera warranty is void if opened.
- 1.11 Unplug the product from the wall outlet and consult a licensed service technician when the following conditions arise:
 - If the power cords are damaged or frayed.
 - If liquid is spilled into the product or the product has been exposed to rain or water.

2. Installation

- 2.1 For security consideration, please make sure any mounts that are used are standard UL or CE safety certified and installed by technician personnel.

3. Storage

- 3.1 Do not mount camera where power cord can be stepped on, as this may result in fraying or damage to the lead or the plug.
- 3.2 Never allow debris or objects of any kind to penetrate camera body. Never allow liquid of any kind to spill onto or into the camera body.
- 3.3 Unplug this product during thunderstorms, during electrical surges, or if it is not going to be used for an extended period of time.
- 3.4 Do not place camera or accessories on top of vibrating equipment or heated objects.

4. Cleaning

- 4.1 Unplug all the cables before cleaning. Use a damp cloth for cleaning. Do not use liquid or aerosol cleaners or allow any liquids to enter camera body.

Precautions

Warning: To reduce the risk of fire or electric shock, do not expose this camera to rain, moisture, debris or liquids.

If the HD camera will not be used for an extended time, unplug it from the power socket.

Caution: To reduce the risk of electric shock, do not remove cover (or back). No user-serviceable parts inside. Refer servicing to licensed service personnel. Please do not open it by yourself

This symbol indicates that this equipment may contain dangerous voltage which could cause electric shock.

This symbol indicates that there are important operating and maintenance instructions in this User Manual with this unit.

FCC Warning

This product has been tested and found to comply with the limits for a Class B computer device, pursuant to Article 15-J of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus as set out in the interference-causing equipment standard entitled “Digital Apparatus” ICES-003 of Industry Canada.

Cet appareil numérique respecte les limites de bruits radioélectriques applicables aux appareils numériques de Classe B prescrites dans la norme sur le matériel brouilleur: “Appareils Numériques,” NMB-003 édictée par l’Industrie.

EN55032 (CE Radiation) Warning

Operation of this equipment in a residential environment could cause radio interference.

2. Function Introduction

2.1 I/O functions Introductions

No.	Item.	Function Descriptions
1	Lens	30x HD/UHD camera lens
2	Tally indicator light	Tally light displays status of the camera
3	Network port	Network port. Support routers or hubs (IEEE 802.3 af) with PoE power supply support
4	HDMI output	The factory output resolution is 4K/30. Please make sure that the connected display device supports 4K resolution
5	RS232 output	RS232 output port. At most 7 cameras can be connected in a serial connection
6	RS232 input	RS232 input port. At most 7 cameras can be connected in a serial connection
7	DC 12 V power connector	AC power supply connecting port
8	Power indicator light	After power is on, the indicator light will display in red
9	Audio input	3.5mm Audio Input supports Line-level or Mic-level Stereo/Mono input
10	Audio output	Loop-through 3.5mm Output
11	Tripod screw holes	The camera is mounted on a (specification) 1/4", 20 UNC tripod deck

2.2 Tally Indicator Light Function Description

2.2.1 The tally indicator light function may be enabled through the control of RS232 command.

The setting method is as follows:

Tally Mode : 8x 01 7E 01 0A 01 0p FF

p = 0 : OFF

p = 4 : On (half-brightness)

p = 5 : On (full-brightness)

4. Network Function Settings

4.1 Web System Requirements

4.1.1 Web Browser:

- Internet Explorer 11 or above
- FireFox 66.0.3 or above
- Chrome 73 or above
- Edge 42.17134 or above
- Safari 12.1 or above

4.2 Connecting Camera to Network

4.2.1 Connecting to Internet

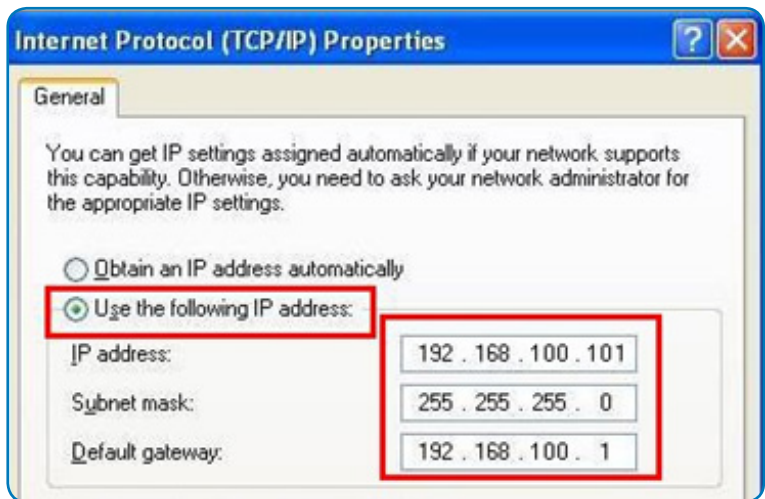

Two common connection methods are shown below

1. Connecting via switch or router

2. If the camera is connected to the computer directly, the computer IP address must be modified to have the same network segment as the camera
For example, the factory-preset default IP address of CV420-30X-IP is 192.168.100.100. The computer IP address must be set with the same subnet, such as 192.168.100.101, so that the computer can be connected correctly with the camera

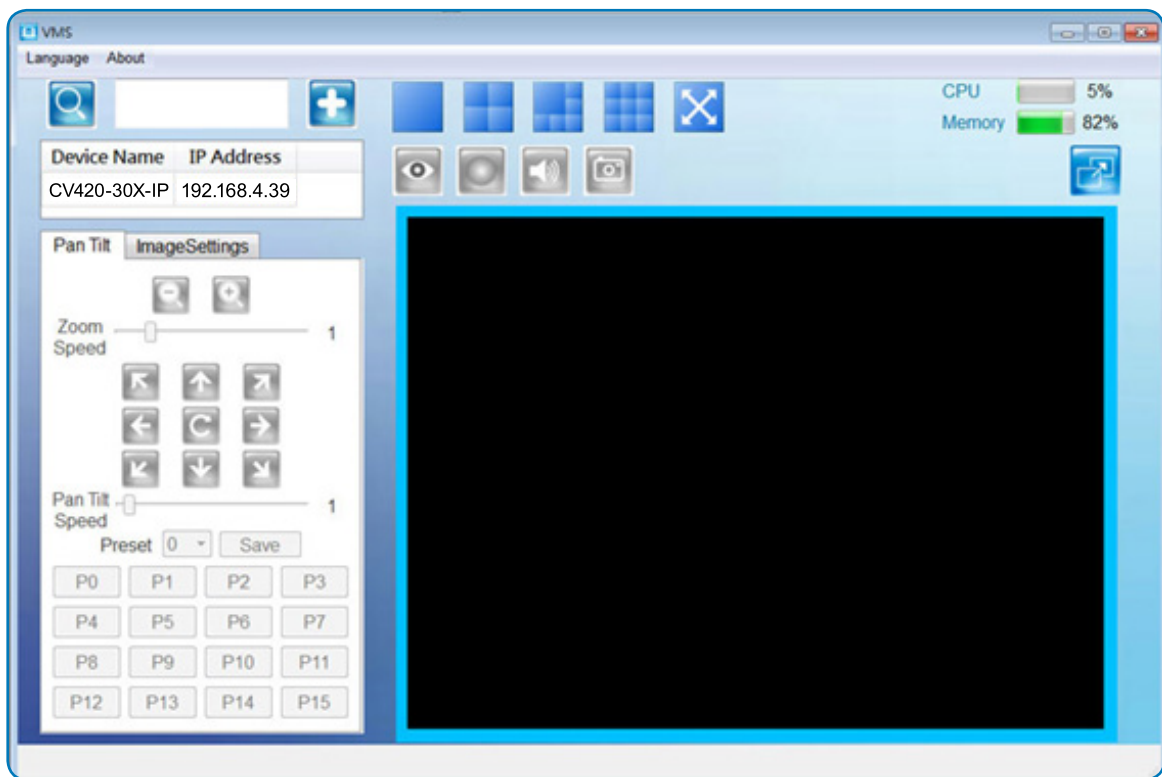

- Connection Diagram
- Change network settings

4.2.2 Using Marshall VMS Software to View the Images

- The CV420-30X-IP DHCP initial setting is ON. If it is connected to the local area network (LAN), the camera IP can be retrieved via the following methods
- Install Marshall VMS software (Please download from the Marshall official website, www.marshall-usa.com)
 - Open Marshall VMS software
 - Search for the camera: Press [automatically search for the device] button to locate the CV420-30X-IP camera
 - Click CV420-30X-IP in the list and start operation after connecting to network

Note: When using automatic search, the camera and computer must be in the same network segment, e.g.: 192.168.4.X

4.2.3 Using the Browser to View the Images

- Open the browser, and enter the URL of CV420-30X-IP in the IP address bar
e.g.: http://192.168.100.100 (default IP address)
- Enter administrator’s account and password
Account: admin (Default)
Password: 9999 (Default)

4.2.4 Using RTSP Player to View the Images

Besides the browser and VMS, other free software also can be used for RTSP connection, such as VLC, Quick Time, PotPlayer, and other free software

RTSP connection address formats are as follows:

- RTSP Main Streaming => rtsp://camera IP:8554/hevc
- RTSP Sub1 Streaming => rtsp://camera IP:8557/h264
- RTSP Sub2 Streaming => rtsp://camera IP:8556/h264
-

Example: Open VLC software and input the URL: rtsp://192.168.100.150:8557/h264

6. Troubleshooting

This chapter describes problems you may encounter while using CV420-30X-IP. If you have questions, please refer to related chapters and follow all the suggested solutions. If the problem remains, please contact your distributor or the service center.

No.	Problem	Solution
1	Boot without power signal	<ol style="list-style-type: none"> 1. Make sure you have plugged in the power cord. 2. When using a PoE connection, ensure that the power supply supports IEEE 802.3af hubs
2	There is no image output from CV420-30X-IP	<ol style="list-style-type: none"> 1. Check the power supply or PoE supply functions. 2. Confirm the output signals are in streaming output. 3. If the camera is connected to a monitor, confirm the monitor equipment supports 4K output 4. Replace the cables and make sure they are not faulty.
3	CV420-30X-IP image is severely delayed	Please use 4K, 1080p or 720p 60/50 Hz signals rather than 25/30 Hz signals.
4	RS-232 cannot be controlled	<ol style="list-style-type: none"> 1. Confirm the connection is correct (RS-232 Input / Output). 2. Please make sure the Baud rate setting is the same as the control equipment.
5	Whether the Internet can be used for operation	Please refer to Chapter 5 Network Function Description for the Internet usage or call marshall tech support.

Warranty

Marshall Electronics warrants to the first consumer that this device will, under normal use, be free from defects in workmanship and materials, when received in its original container, for a period of two years from the purchase date. This warranty is extended to the first consumer only, and proof of purchase is necessary to honor the warranty. If there is no proof of purchase provided with a warranty claim, Marshall Electronics reserves the right not to honor the warranty set forth above. Therefore, labor and parts may be charged to the consumer. This warranty does not apply to the product exterior or cosmetics. Misuse, abnormal handling, alterations or modifications in design or construction void this warranty. No sales personnel of the seller or any other person is authorized to make any warranties other than those described above, or to extend the duration of any warranties on behalf of Marshall Electronics, beyond the time period described above.

Due to constant effort to improve products and product features, specifications may change without notice.
