

Television broadcast and theatrical productions

Sennheiser and Apogee have partnered to offer a personal recording solution that combines superior, clip-on microphone technology with legendary digital audio conversion.

Designed to deliver incredible quality in a compact and easy to use system, MKE 2 digital sets a new standard in broadcast speech recording, empowering anyone to make professional audio recordings on their iPhone, iPad or iPod touch.

The industry standard MKE 2 is a high-quality, miniature clip-on microphone which is suitable for both speech and instrument miking applications. It fulfils the most stringent demands on sound quality and is extremely rugged. A special Umbrella Diaphragm™ and a welded housing protect the MKE 2 against sweat and moisture, making it an ideal choice for mobile recordings.

Apogee Apps for MKE 2 digital

MetaRecorder

Maestro

Apogee's MetaRecorder is a two-channel audio recording app made specifically for Sennheiser's clip-on digital microphones. MetaRecorder makes recording, tagging and organizing audio in the field simple and efficient. It is also the first iPhone recording app to export XML files for Final Cut Pro X.

As an alternative to MetaRecorder, Apogee's Maestro App offers full control of MKE 2 digital if you are using a video recording app like FILMiC Pro or the Camera app that comes on your iOS device.

MetaRecorder and Maestro offer basic presets that let you shape the sound of your MKE 2 digital microphone with EQ, compression and limiting to achieve the most natural or unique result.

Download Apogee MetaRecorder or Apogee Maestro from the App Store.

Mobile Recording MKE 2 digital

Mobile Recording MKE 2 digital

Professional digital clip-on microphone for iPhone, iPad & iPod touch

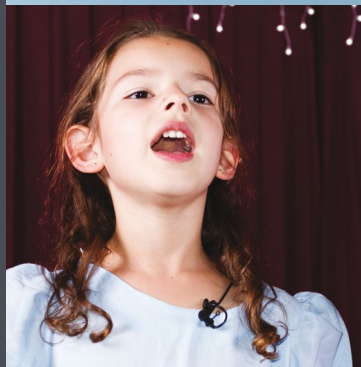

Powered by

Speech

MKE 2 digital is perfect for anyone who wants a simple high-quality setup to record Podcasts, presentations, interviews or meetings directly to their iPhone.

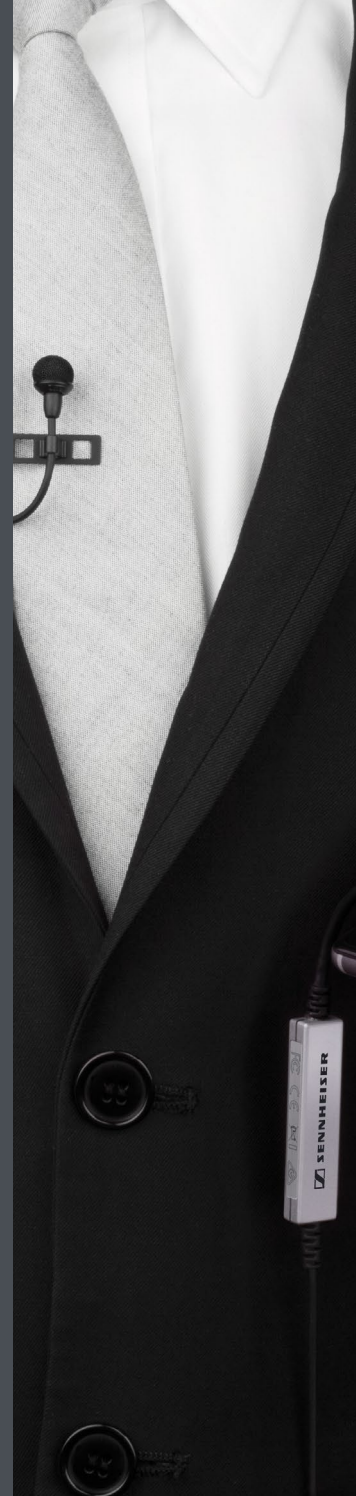

Events

There are amazing moments happening in your life you'll want to relive in the years to come. Children's recitals, performances, weddings, anniversaries and retirement parties - capture these memories with the best sound quality possible using MKE 2 digital. Use Apogee MetaRecorder App to mark your favorite moments and make editing the video easy.

Film

You can rely on iPhones as flexible tools for film production. When paired with DSLR video cameras, MKE 2 digital and an iOS device make capturing professional quality productions simple and efficient. Apogee's MetaRecorder is the first app to offer a simple and customizable way to organize audio media files while recording in the field, transforming your post production video workflow.
