

KD-120 V-Kick Trigger Unit

Incredible Mesh-Head Kick Pad!

The KD-120 V-Kick Trigger Unit gives V-drums and Roland Compact Drum System owners a sturdy, super-accurate kick drum triggering pad based on the V-drums' highly acclaimed mesh drum head design. Thanks to this revolutionary design, the KD-120 offers extremely natural playing feel with just the right amount of rebound, as well dramatically reduced tremble and superior, noise-free performance.

** Product pictured is a prototype model. Actual product appearance may be subject to change.*

** Pedal not included.*

- Sturdy, 12-inch kick drum pad/trigger with super-accurate triggering and adequate rebound for natural acoustic drum feel
- Highly-acclaimed mesh drum head absorbs unwanted tremble and provides superior, noiseless performance
- Can be used with any standard (vertical beater) kick drum pedal, including double-bass pedals
- Four-leg stand prevents slipping even during aggressive playing
- Can be used to trigger the V-drums TD-10 percussion sound module, as well as a complete range of electronic percussion modules (TD-7, TD-5, SPD-20, etc.)
- Suitable for late-night practice or recording with minimum noise

Sturdy, Natural, Extremely Accurate Kick Drum Triggering

Reinforcing the V-drums' position as the best-sounding, most natural electronic drum system ever developed, the new KD-120 V-Kick Trigger Unit provides sturdy, natural, extremely accurate kick drum triggering for a range of drumming applications. This is accomplished thanks to the KD-120's unique mesh drum head design, which provides just the right amount of rebound and damping to ensure ultra-quiet performance, and a sturdy, four-leg stand which

prevents slipping even during aggressive drumming. At only 12-inches in diameter, the KD-120's response has been engineered to "feel" as if a drummer is playing a much larger kick drum.

The end result of this marriage of technology and ergonomics is an ideal kick drum pad/trigger which can be used with any standard (vertical beater) bass drum pedal—including double bass pedals—as well as a variety of electronic percussion sound modules (Roland TD-10, TD-7, TD-5, SPD-20, and others). And its attractive design provides the perfect aesthetic compliment to the entire V-drum system.

Specifications

Trigger
1 (head)

Diameter
305 mm / 12 in.

Dimensions
490 (W) x 400 (D) x 500 (H) mm/ 19-5/16 x 15-3/4 x
19-11/16 in.

Weight
7.7 kg / 17 lbs.

Accessories
Connection Cable, Beater

Option
MH-12 Replacement Head
