

Configuration:

GE00001 Multi-Turn Preformed Loop for CLD1

Product Overview:

The GE00001 multi-turn preformed loop is used in small type applications such as your airport and bank teller counters, kiosks, taxis and buses. The loop is used with the CLD1 Compact Loop Driver.

Highlights:

- Multi-turn preformed loop is used with the CLD1 compact loop drivers
- The preformed loop is designed for use in counters and can be placed under chairs to provide a localized over-spill loop

Includes:

One (1) GE00001 Multi-Turn Preformed Loop for CDL1
