

# MS7201

## Round Base Microphone Stand

MICROPHONE STANDS

### FEATURES AND BENEFITS

An industry standard! The MS7201 is one of the most popular microphone stands ever made. This classic design has several added features available only from On-Stage Stands®, including the 7 lb. sand-cast base which is sturdy enough for road abuse yet light enough to carry. The MS7201 also features a die-cast zinc clutch and 5/8" - 27 solid threaded upper shaft. This model is available with a black shaft (MS7201B) or chrome shaft (MS7201C).

5/8" - 27 solid threaded upper shaft.

Mid-point die-cast zinc clutch. Internal "counter clutch" mechanism holds upper shaft in place until desired height adjustments are made. This prevents microphones from crashing down when clutch is loosened.

7 lb. Sand-cast base with rubber padding for reduced floor vibrations.
