

POCKET PULSAR™

300mW Triple Aperture RGB Laser

Pocket Pulsar™ is an R/G/B laser that can create stunning displays of red, green, and blue fat beam lasers in auto mode, or it can hypnotically spin to the beat of the music in sound active mode.

Using just 7 or 9-channels of DMX, Pocket Pulsar™ also allows direct access + control of sound active mode, auto mode, and manual mode with 3-lens position selection, flash control, spin direction, and speed.

And of course, Pocket Pulsar™ is backed by Blizzard's 2-year limited warranty!

Laser Specifications

Color	Wavelength	Power Output
Red	650nm	100mW
Green	532nm	50mW
Blue	450nm	150mW

Main Features

- Triple aperture R/G/B laser system
