

REA-L0400

Chroma-key-less CG Overlay License for
Edge Analytics Appliance

Overview

The REA-L0400 optional license activates the Chroma-key-less CG overlay feature for the REA-C1000 Edge Analytics Appliance.

Using Sony's advanced motion detection technology, the presenter's image is extracted and overlaid onto any background image, animation or video in real time — creating a high-quality backdrop without the need for dedicated studio equipment or a specialist graphics operator.

Note: This is an activation key for pre-installed software
