ARTEC-312.64

DESCRIPTION

The ARTEC-312.64 is a compact 2-way full-range loudspeaker system comprised of one 12" low frequency transducer and one M-34 compression driver with titanium diaphragm. The rotatable waveguide provides 60° x 40° coverage and allows the systems to be installed in either the vertical or horizontal position maintaining the needed dispersion characteristics.

The Artec-300 cabinets are constructed from Baltic Birch plywood and finished with a durable ISO-flex paint. The trapezoidal enclosure design helps eliminate standing wave coloration and at the same time, permits close-packed horizontal or vertical arrays.

The cabinet is fitted with M10 threaded suspension points. Four VESA75/VESA100 standard threaded mounting points on the rear of the cabinet provide a secure fixing point for DAS mounting brackets.
