

C-FM6/FM6 SERIES

The Kramer FM6/FM6 cables are high performance cables with 6-pin Fire Wire connectors at both ends. They are used primarily for data transfer (IEEE 1394) at speeds up to 400Mbps between multimedia devices such as digital cameras, VCRs, CD drives, hard disks, scanners, graphic cards and editing systems.

- **Quality Construction** - Constructed using two separately double-shielded data cables and a 22 gauge pair for power transmission, all in an overall double-shielded outer jacket.
- **High Quality Connectors** - Has molded 6 pin connectors on both ends. The 6 pin connector is popular on larger devices like computers because it offers full support of high speed data transmission, and the ability to power a device downstream.
- **Varied Selection of Lengths** - Available in 3, 6, 10, 15, and 25 foot lengths.

**CONFIGURATIONS**

MODEL	DESCRIPTION	FEET
Male - Male		
C-FM6/FM6-3	6-pin to 6-pin FireWire Cable	3'
C-FM6/FM6-6	6-pin to 6-pin FireWire Cable	6'
C-FM6/FM6-10	6-pin to 6-pin FireWire Cable	10'
C-FM6/FM6-15	6-pin to 6-pin FireWire Cable	15'
C-FM6/FM6-25	6-pin to 6-pin FireWire Cable	25'
