POWER CONDITIONING TECHNOLOGIES

SXN1240

SURGE ELIMINATOR & POWER CONDITIONER

- **Advanced Series Mode®** Surge Protection
- **Impedance Tolerant®** EMI/RFI Filtering

The SXN1240 provides guaranteed surge protection for dedicated power lines. The unit comes in a 12" x 12" x 4" NEMA enclosure and meets code for use in ceiling plenums. The SXN1240 is 20-amp load capable and is specifically designed for international use in 240 volt systems with single-phase power requirements. The standard model has one surge suppression module.

The unit features both common mode and normal mode *Impedance Tolerant* EMI/RFI filtering for a comprehensive power conditioning solution.

SurgeX Advanced *Series Mode* technology is superior to conventional MOV circuitry or MOV-Hybrid designs and is completely non-sacrificial. Our zero let-through technology provides the most reliable protection available. It stops all surges up to 6,000 volts (unlimited surge current) without producing harmful side effects such as ground contamination or common-mode disturbances.
