OMX-PSW6AB

6x1 Balanced Stereo Audio Passive Switcher

The **OMX-PSW6AB** is a passive 6 x 1 balanced stereo audio switcher. Featuring high quality 1/4" inch Tip-Ring-Sleeve connectors, the **OMX-PSW6AB** offers a quick and solution to the requirement for fast audio selection from multiple sources into one source. As an audio port expander the product eliminates the need for patching and performs as a simple 6 x 1 router. As an assignment switcher the **OMX-PSW6AB** can be used to feed a single balanced audio output to 6 selectable destinations by simply pushing a button. The **OMX-PSW6AB** is a workhorse unit designed for today's demanding multi-format production facilities where a transparent audio switcher is in demand. In conjunction with our **OMX-PSW6RS** 422 switcher, this combination is a powerful answer to the single port configurations of Non-linear edit systems.
