

ColorSource PAR

Quality now comes with a tiny price tag

In a sea of cheap LED fixtures, it's easy to see why the ColorSource™ family of luminaires stands out. After years of research and testing, ETC has developed a state-of-the-art, budget-friendly LED PAR luminaire that doesn't sacrifice quality for price. And because it's made by ETC, you get the industry-leading quality and support that worldwide customers have come to know and love over the years.

ColorSource PAR

RGB with a twist... of lime!

Many manufacturers add amber, white or both to their RGB fixtures in an attempt to balance out the color spectrum. ETC's lighting experts have found that adding lime does something quite spectacular to a standard RGB mix of colors – it fills in the gaps often neglected by RGBA or RGBW fixtures, resulting in a more vibrant, color-rich palette.

Smooth operator

You don't need to pay big-budget prices to get professional-quality dimming from an LED. Simple and straightforward RGB color-mixing tools let you choose the perfect blend of colors for your application, without needing a degree to know how to operate it. You can even recall preset scenes and sequences with the built-in user interface.

More than just an LED – it's an investment

Manufactured in ETC's Middleton, Wisconsin factory, the ColorSource PAR is designed and built to last. Each luminaire is optically calibrated, so you get the same uniform color from fixture to fixture. The ColorSource PAR also uses the same standard accessories as the Selador® Desire® D40 luminaire, so you can mix and match to get the most from your inventory.

Product Features

- Easy-to-use RGB control
- RDM capability
- Power in and thru with Powercon
- DMX in and thru
- Low-noise fan operation
- Droop compensation for consistent output
- Optically calibrated
- Homogenized optics
- Available in black, white and silver (custom colors also available)
