

MV7X PODCAST MICROPHONE

FEATURES & BENEFITS

Voice Isolation Technology

The MV7X features the same impressive combination of dynamic cartridge, cardioid pick-up pattern and shock mount as the MV7. Have confidence that your MV7X will bring your voice to the forefront of the recording and reject any unwanted background noise for perfect recordings in imperfect rooms.

Trusted Heritage, Classic Design

Designed with podcasters in mind and modelled from the legendary SM7B for integration into any podcasting set up and workflow.

XLR Output

Connect to all professional interfaces with ease via XLR without the need to add an in-line pre-amp for additional gain.

Mic Stand Compatible

MV7X contains 5/8" threaded yoke to attach to any 5/8" threaded mic stand. Also included in the box is 5/8" to 3.8" Euro thread adapter for compatibility with most mic stands.
