

Lecternette

The Original... and Still the Best

Complete and Compact

Lecternette® is the original, patented, portable public address system of lectern construction. Everything needed for convenient operation is contained in one, ease-to-use, single folding cabinet. Ample storage space is provided for accessories and all controls are at fingertip reach.

Design

The design of the basic unit is compact, of pleasing and dignified appearance, and is easy to handle. It is both easy to set up and easy to put away. The control panel is conveniently arranged with all the essential controls and instruments necessary to accommodate the lay speaker and the professional lecturer. Operation is simple and efficient...anywhere. All models are finished in a durable, scuff-resistant gunmetal gray polypropylene fabric that will maintain its appearance even under heavy usage. Other colors available at a nominal upcharge.

Introduction

Lecternette is designed to make any indoor or outdoor area a suitable meeting place by providing both an efficient public address set and a reading counter. Self-contained batteries eliminate the need for A.C. power. You can make any meeting place a better place to meet...with Lecternette

L56C

Our professional Model L56C. Includes features that make it the choice of those needing a system where large groups or difficult conditions are anticipated. Exclusive features include: a separate, built-in amplifier with volume control for Add-On® Speakers, tone controls, also, includes other additional features such as tone controls, auxiliary microphone volume controls, and auxiliary input volume controls.

L46C

The favorite Lecternette, Model L46C, with tape recorder connectors and reading lamp, is designed as an all-purpose sound amplification system for schools, churches, hotels, and any place high quality sound is needed but not normally provided. A. C. and battery operation permits you to use the Lecternette Anywhere. If your meeting groups number up to 600 people, we invite you to examine and hear the Lecternette Model L46C ...It will speak for itself!

L16C

The L16C Lecternette is a compact, easy-to-use, portable sound system designed for medium sized groups. The L16C features one lectern microphone input, one auxiliary microphone input with independent volume control, and one combination auxiliary input and output for tape recorders, phonos, tuners, etc. An on/off switch and battery condition meter complete the controls and switches provided. Extra extension speakers such as our A06C Add-On Speakers may be connected for extended audience coverage.

L8C

Our Lecternette Model L8C is the smallest, lightest and easiest to use portable public address system we've ever made! An excellent choice when light weight, compact size and low price are important. It weighs just 19 pounds and sets up quickly and effortlessly, yet it is built with the same care and quality components as our larger units. Standard features include a solid state 8-watt RMS amplifier, unidirectional microphone and telescopic microphone support, an auxiliary input for high-level accessories, and one auxiliary microphone input. Optional A08C extension speaker that stores inside available as an option.

**R600**

Our "Industrial Strength" Lecternette is a basic Model L46C Lecternette specially modified to tailor the unit to the rigors of daily commercial and rental use. Designed to look and sound good for many years, we know you will be most satisfied. Charcoal gray finish is standard; other colors available at a nominal charge. Features include heavy-duty luggage latches, permanently attached microphone and power cord to eliminate loss and theft. 1/4 in phone jacks are provided as speaker connectors to accommodate most institutional type loudspeakers. XLR type microphone, and 1/4 inch phone jack are supplied to accommodate nearly all microphones.

AR62C-A

Model AR62C-A, a general purpose lightweight wireless amplification system complete with microphone and transmitter. An excellent system for classrooms, business presentations and training sessions. Operation is both A. C. and battery. For extra flexibility, the AR62C-A will accept an additional hard wired microphone as well as line inputs.

Your Local Dealer

Folding Stand: The perfect complement to your Lecternette®. A matching stand enhances the appearance of your lectern while preserving the important feature of portability. Has built-in speaker column for increased audience capacity and places Lecternette at proper height. Folds into a compact, easy-to-carry unit, complete with handles. Fits Lecternette Models L56C, L46C, and L16C.

Wireless Microphones: Add some real freedom of movements with our MWAV wireless microphones. The receiver is built into the lectern so there are no cables to become lost or worn. Transmitter and microphone store in the handy Lecternette accessory compartment, choice of lavalier or handheld transmitter. Not available for L8C.

Add-On Speakers: A natural companion to the Lecternettes. Designed to extend voice amplification to larger groups or to conquer unusual acoustical problems. Models A06 and A016 are good choices to use with Lecternettes.

Model TR50A Tripods (optional) are designed to store in each half of the Add-On Speaker set.

SC46 Lavalier Set: Consists of one cardioid microphone, 20-ft. cable, lavalier and windscreen stand adapter.
