| Operation range | Approx. 30 m [98 ft 5 in] (when operated directly in front of signal receiver) |
| Dimensions (W x H x D) | 48 x 145 x 27 mm [1-7/8 x 5-23/32 x 1-1/16 in] |
| Weight | Approx. 102 g (3.60 ozs.) including batteries |

Other Applications

Multi Monitoring Control Software (for Windows)

Logo Transfer Software (for Windows)

Geometry Manager Pro (for Windows) *Some features only available after August 2022.

Supplied accessories

Wireless remote control unit (x 1)

Power cord with secure lock (x 1) (x 2 for Europe/ASIA models)

Batteries for remote control (AAA/R03 or AAA/LR03 battery x 2)

Optional accessories

Ceiling Mount Bracket ET-PKD120H (for high ceiling)

ET-PKD120S (for low ceiling)

Projector Mount Bracket ET-PKD130B

DIGITAL LINK Switcher ET-YFB200G *Not compatible with 4K signal input. Digital Interface Box ET-YFB100G *Not compatible with 4K signal input.

Early Warning Software ET-SWA100 Series *The suffix of the Model No. differs according to the license type.

AJ-WM50 Series *The suffix at the end of the model number is omitted. Operating temperature: 0-40 °C (32-104 °F). Wireless module

Product availability may vary by country or region.

Geometry Manager Pro Upgrade kit (preactivated) ET-UK20 *Some features only available after August 2022.

Auto Screen Adjustment Upgrade kit (preactivated) ET-CUK10/CUK10P *Some features only available after August 2022.

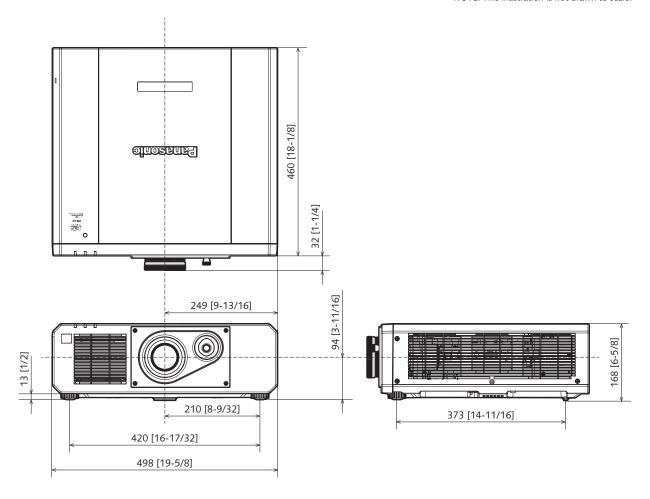

Measurement, measuring conditions, and method of notation all comply with ISO/IEC 21118: 2020 international standards
When using a signal other than 120 Hz/240 Hz, this resolution cannot be displayed.
Around this time, light output will have decreased by approximately 50%. IEC62087: 2008 Broadcast contents, NORMAL Mode, Dynamic Contrast [2], under conditions with 30 °C (86 °F), 700 m (2,297 ft) above sea level, and 0.15 mg/m³ of particulate matter. Estimated time until light output declines to 50% varies depending on environment.
4K/60p signals are converted to the projector's resolution upon projection. Supported terminals: DIGITAL LINK/HDMI®.
With legs at shortest position.
Average value. May differ depending on the actual unit.
When using the projector at an altitude lower than 2,700 m (8,858 ft) above sea level, and the operating environment temperature becomes 29 °C (84 °F) or higher, the light output may be reduced to protect the projector.
When using the projector at an altitude between 2,700 m (8,858 ft) and 4,200 m (13,780 ft), and the operating environment temperature becomes 25 °C (77 °E) or higher, the light of the light output may be reduced to protect the projector at an altitude between 2,700 m (8,858 ft) and 4,200 m (13,780 ft), and the operating environment temperature becomes 25 °C (77 °E) or higher, the light When using the projector at an alltitude between 2,700 m (8,858 ft) and 4,200 m (13,780 ft), and the operating environment temperature becomes 25 °C (77 °F) or higher, the light

output may be reduced to protect the projector.

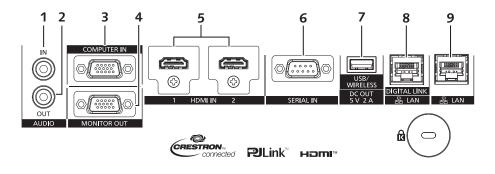

8 4K/60p signal input is converted to projector's resolution, supports YP₈P₈ 4:2:0 format only.

Dimensions

Projected image and throw distance

Install the projector referring to the projected image size and projection distance. Image size and image position can be adjusted in accordance with the screen size and screen position.

• Following illustration is prepared on the assumption that the projected image size and position have been aligned to fit full in the screen.

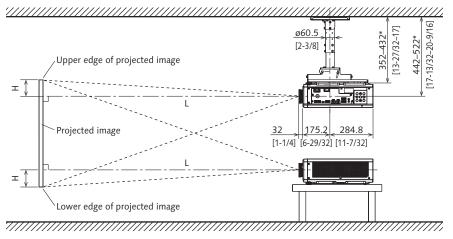

| L (LW/LT) ¹ | Projection distance |
|------------------------|---|
| SH | Projected image height |
| SW | Projected image width |
| Н | Distance from the lens center to the bottom edge of the projected image |
| SD | Projected image size |

1 LW : Minimum projection distance LT : Maximum projection distance

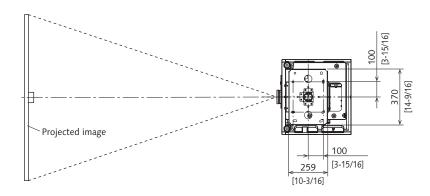

Standard setting-up position

Illustrations show the projector installed using optional ceiling mountbracket ET-PKD120H, optional bracket assembly ET-PKD130B.

unit : mm [inch] NOTE: This illustration is not drawn to scale.

* Adjustable in 40 mm [1-9/16 in] steps.

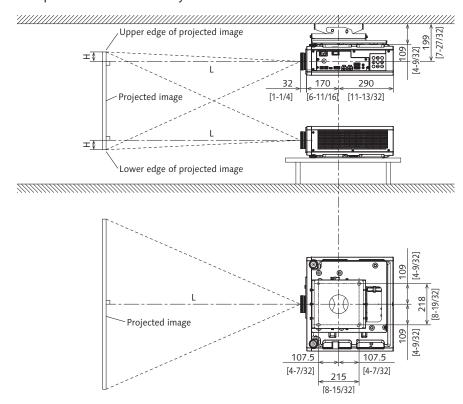

Caution

- All construction work should be done by a qualified technician.
- When mounting to the ceiling, use the special mounting bracket.
 Furthermore, in order to prevent it from falling down from the ceiling, use the supplied wire on the mounting bracket.

Standard setting-up position

Illustrations show the projector installed using optional ceiling mountbracket ET-PKD120S, optional bracket assembly ET-PKD130B.

unit : mm [inch] NOTE: This illustration is not drawn to scale.

- All construction work should be done by a qualified technician.
 When mounting to the ceiling, use the special mounting bracket.
 Furthermore, in order to prevent it from falling down from the ceiling, use the supplied wire on the mounting bracket.

Projection distance

A ±5% error in listed projection distances may occur.

When [SCREEN ADJUSTMENT] is used, distance is corrected to become smaller than the specified image size.

Calculation of the projection distance

To use a projected image size not listed in this manual, check the projected image size SD (m) and use the respective formula to calculate the value.

The unit of all the formulae is m. (Values obtained by the following calculation formulae contain a slight error.)

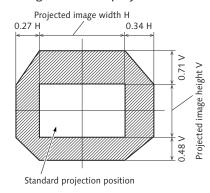

When calculating the value using image size designation (value in inches), multiply the value in inches by 0.0254 and substitute it into SD in the formula.

| | Aspect ratio 16:9 | Aspect ratio 16:10 | Aspect ratio 4:3 |
|----------------------------------|------------------------|------------------------|------------------------|
| Projected image size Height (SH) | = SD x 0.490 | = SD x 0.530 | = SD x 0.6 |
| Projected image size Width (SW) | = SD x 0.872 | = SD x 0.848 | = SD x 0.8 |
| Minimum projection distance (LW) | = 1.2906 x SD - 0.0534 | = 1.3952 x SD - 0.0534 | = 1.5795 x SD - 0.0534 |
| Maximum projection distance (LT) | = 2.5693 x SD - 0.0398 | = 2.7776 x SD - 0.0398 | = 3.1444 x SD - 0.0398 |

Adjustment range by the lens position shift (optical shift)

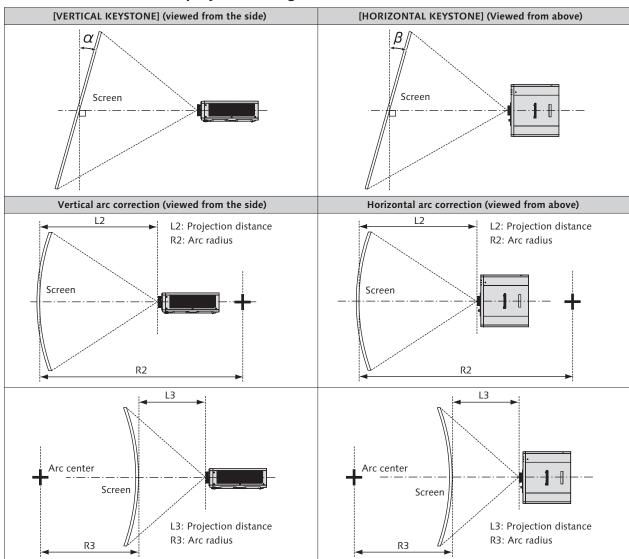

Based on the standard projection position using the optical axis shift function, the projection position can be adjusted in the range shown in the following figure.

Following figure shows the adjustment range when the projector is installed on the floor.

 Optimal image can be achieved by installing the projector squarely in front of the screen and adjusting the lens shift lever to center.

[SCREEN ADJUSTMENT] projection range

| Only [KEYS | TONE] used | | [KEYSTONE] and [CU | Only [CURVED] used | | | |
|------------------------|------------------------|------------------------|------------------------|--------------------|---------------|---------------|---------------|
| Vertical keystone | Horizontal keystone | Vertical keystone | Horizontal keystone | Min. value of | Min. value of | Min. value of | Min. value of |
| correction angle α (°) | correction angle β (°) | correction angle α (°) | correction angle β (°) | R2/L2 | R3/L3 | R2/L2 | R3/L3 |
| ±40 | ±20 | ±20 | ±15 | 0.9 | 1.7 | 0.5 | 1.0 |

[•] When [SCREEN ADJUSTMENT] is used, the focus of the entire screen may be lost as correction increases.

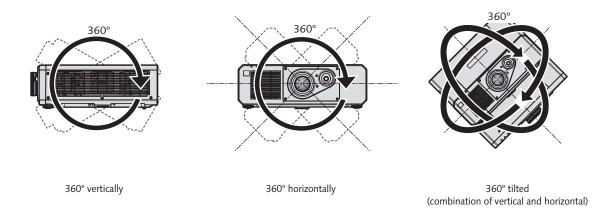

Make the curved screen a circular arc shape with one part of a perfect circle removed.

1-Chip DLP™ Projectors

Installable angle

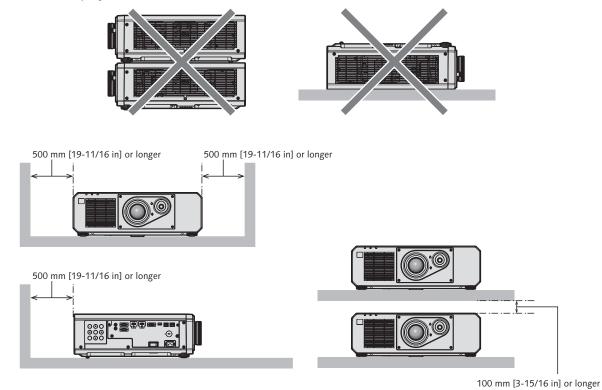

Install the projector at an angle within the range shown below.

Projection in all 360° direction

Cautions when setting up the projector

- Do not stack projectors on top of each other.
- Do not use the projector supporting it by the top.
- Do not block the intake and exhaust vents of the projector.
- Prevent hot and cool air from the air conditioning system to blow directly to the intake and exhaust vents of the projector.

Do not install the projector in a confined space.
 When installing the projector in a confined space, provide air conditioning or ventilation separately.
 Exhaust heat may accumulate when the ventilation is not enough, triggering the protection circuit of the projector.

List of compatible signals

The following table specifies the image signals that the projector can project. This projector supports the signal with ✓ in the compatible signal

• The content of the signal type column is as follows.

-V: Video signal -C: Computer signal

| Signal | Signal name | Resolution | Scannir | ng freq. | Dot clock | Compatible signal | | | |

¹ The signal with 1/1.001x vertical scanning frequency is also supported. 2 YP_θP_R 4:2:0 format only 3 VESA CVT-RB (Reduced Blanking)-compliant

- A signal with a different resolution is converted to the number of display dots. The number of display dots is as follows. 3840 x 2160 However, when the input signal is 1080/120p or 1920 x 1080/240, the number of display dots is as follows. 1920 x 1080
- The "i" at the end of the resolution indicates an interlaced signal.
- The "i" at the end of the resolution indicates an interlaced signal.
 When interlaced signals are connected, flickering may occur on the projected image.
 When the DIGITAL LINK connection is made with the long-reach communication method, the signal that the projector can receive is up to 1080/60p (1920 x 1080 dots, dot clock frequency 148.5 MHz).
 Even if it is the signal listed in the list of compatible signals, it may not be displayed by the projector if the image signal is recorded in a special format.
 Horizontal shift and zoom cannot be used when using the following 4K YUV420 signals.
 3840x2160/60p YUV420 3840x2160/50p YUV420 4096x2160/60p YUV420

List of Plug and play compatible signals

The following table specifies the image signals compatible with plug and play.

Signal with \checkmark in the plug and play compatible signal column is the signal described in the EDID (extended display identification data) of the projector. For the signal without \checkmark in the plug and play compatible signal column, the resolution may not be selected on the computer even if the projector is supporting it.

| | Resolution (Dots) | Scannir | Scanning freq. | | Plug and play compatible signal | | | | | | | |
|---|--------------------------|---------------------|------------------|--------------------|---------------------------------|--------------------------|----------|----------|------------|--------------------------|----------|--|
