

Model Series L184

Description

Lowell rackmount power panel Series L184 mounts in the front of a rack (or to rear rack rails if available) with outlets facing inward to provide convenient plug-in access for rack mounted equipment. Devices are Listed under UL Standard 5 and include a 2RU panel with four (4) duplex outlets, optional surge suppression feature, and choice of termination. Each assembly measures 19"W x 3.5"H x 2.75"D and is finished in black powder epoxy.

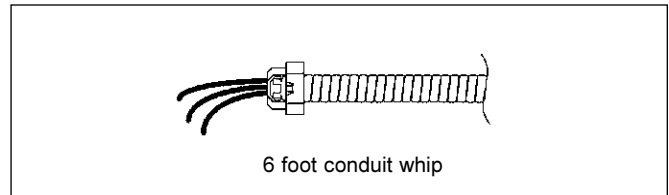

For 1RU rackmount power panels with front-mounted switch controls, please refer to Series U181.

L184, L184-MC are 15 amp power panels that terminate with pigtail leads or a six-foot metal clad (conduit) whip respectively. Both include four standard duplex outlets.

L184-TVSS, L184-TVSS-MC are 15 amp power panels that terminate with pigtail leads or a six-foot metal clad (conduit) whip respectively. Both include four duplex outlets with common mode surge suppression feature for use where voltage surges and spikes could occur.
