

Cover Panels - Perforated Steel - L9 Series

Lowell L9 Series ventilated cover panels mount over rackmounted equipment to provide protection from accidental or intentional tampering of controls and settings. Panels mount into the same mounting holes as the equipment. For ease of installation, the panels mount using only two screws, the top left and bottom right. The remaining screw positions on the panel are notched for screw clearance.

L9 Series panels are perforated 18 gauge steel with a protruding 1.5" deep space to accommodate equipment knobs and controls. The perforation pattern is .0781" holes on 1/8" staggered centers to provide protection and heat ventilation for equipment. L9 Series panels are finished in smooth semi-gloss black powder epoxy paint for durable and scratch resistant performance. Panel mounting screws in a variety of head styles are available to meet application needs; see page 2.

Cover Panels - Steel & Plexiglas - L9P Series

Lowell L9P Series see-through plexiglas cover panels mount over rackmounted equipment to provide protection from accidental or intentional tampering of controls and settings. Panels mount into the same mounting holes as the equipment. For ease of installation, the panels mount using only two screws, the top left and bottom right. The remaining screw positions on the panel are notched for screw clearance.

L9P Series panels are 18 gauge steel with a protruding 1.5" deep frame with a smoked plexiglas panel to accommodate and see protected equipment knobs and controls. L9P Series panels are finished in smooth semi-gloss black powder epoxy paint for durable and scratch resistant performance. Panel mounting screws in a variety of head styles are available to meet application needs; see page 2.
