Rane TTM 57SL + Serato VIDEO-SL = Video for DJ's

Serato VIDEO-SL is a software plug-in for Scratch LIVE which adds the ability to playback and mix video files with the Rane TTM 57SL mixer. Manage a variety of video clips from within the Scratch LIVE library and load them onto a virtual deck for control with either vinyl or CD. The controls of the TTM 57SL allow you to mix clips with a variety of transitions, as well as apply exciting effects to each video clip. The mixed output can be sent to your computer's secondary display for connection to external monitors or projectors.

Requires Scratch LIVE 1.8 and the Rane TTM 57SL
 Try the demo version available from www.serato.com
