

PRX900 Series

Powered Portable PA Loudspeakers and Subwoofers

PRODUCT RELEASE DOCUMENT ■ PRODUCT DESCRIPTION ■

JBL PRX900 Series powered loudspeakers and subwoofers take portable PA performance to a new level with advanced acoustics, comprehensive professional DSP, unrivaled power performance and durability, and complete BLE control via the JBL Pro Connect ecosystem.

The line, which includes three powered two-way loudspeakers and two powered subwoofers, is built from the ground up to leverage JBL's latest acoustic innovations. Next-generation driver systems—powered by ultra-efficient Class D amplifiers—deliver clarity and definition at maximum volume, with improved dispersion, beam width and smooth low-frequency extension.

The **PRX900 Series'** class-leading DSP package, accessible via the onboard LCD or the JBL Pro Connect app, includes 12-band parametric EQ for system tuning and nuanced tonal control, integrated dbx Drive Rack technology including live and fixed Automatic Feedback Suppression, soft system limiter and speaker delay settings and presets.

Use the JBL Pro Connect app to control up to 10 speakers, integrate with JBL EON ONE MK2, PRX ONE, and EON700 systems, and access app-only functions including speaker snapshots and groupings.

The **PRX900 Series** is designed to withstand the rigors of the road and is backed by our **seven-year warranty**. Rigid composite loudspeaker cabinets feature a computer-modeled internal ribbing design that increases overall cabinet rigidity, while subwoofers are housed in 18mm plywood birch cabinet with optimized bracing for smooth, accurate low-frequency response. Like all JBL products, everything is reinforced by our industry-leading test and validation protocols.

The **PRX900 Series** is a versatile solution for professional DJs and bands, music venues, houses of worship, corporate audio, or anyone who needs durable systems that deliver powerful, room-filling sound in any portable or installed scenario.
