

VERISMO™

FRESNEL WW

Warm White LED Fresnel + Zoom

High CRI, 3200K Warm White

Verismo™ Fresnel WW is a 3200K warm white fixture, well suited for a variety of applications including theater, video, and production studios thanks to its 300W WW LED module. It is incredibly bright making it perfect for long distance throws, and it offers 2/3/4 or 6-channel DMX control with 16-bit dimming + strobe. It can efficiently help reproduce true colors in comparison with that of natural light thanks to its high CRI of 97.

Loaded with Features

The 200mm (8-inch) Fresnel lens produces a bright circular light with a soft edge, and the beam angle can be adjusted anywhere from 18°-65° using its DMX controllable motorized zoom. User-selectable dimming curves, dimming speed, and frequency mode settings are accessible from its easy-to-use 4-button OLED control menu, and this fixture offers a standard sized 10-inch single slot frame/barndoor holder (accessories not included).

Luminous Intensity

Lux/Meter	2.5 Meter	5 Meter
18° (narrow beam)	22,034 Lux	5,540 Lux
65° (wide beam)	9,886 Lux	2,768 Lux

Main Features

- Light source: 300W WW LED module
- CCT: 3200K, CRI: 97
- 16-bit dimming, 4 selectable dimming curves
- Refresh rates (1000-8000 Hz)
- User selectable dimming speeds
- 18°-65° motorized zoom
- 1-25Hz strobe effects
- Flicker-free resolution, perfect for video
- Fresnel lens: 200mm (8-inch)
- 10-inch single slot frame/barndoor holder
- Aluminum housing (black)
- PowerCON® TRUE1™ compatible in/out
- 3/5-pin male/female XLR input & output
