## Introduction

Handy Guitar Lab for G11 is a remote control application specifically designed for the ZOOM G11 Multi-Effects Processor. Whether you are creating and editing patch memories, managing banks and patch memories or adjusting the system settings, this app allows you to operate an G11 from an iPhone. This manual does not explain the operation of G11. See the G11 Operation Manual for detailed information about all its functions.

## **Installing Handy Guitar Lab for G11**

**1** Open the App Store on the iPhone and search for "Handy Guitar Lab for G11 ".

**2** Tap "GET" on the Handy Guitar Lab for G11 screen.

This will install Handy Guitar Lab for G11 on the device.

#### NOTE

• When you launch Handy Guitar Lab for G11, you must connect it to the G11 so that it will operate

(  $\rightarrow$  "Connecting to the G11" on page 4).

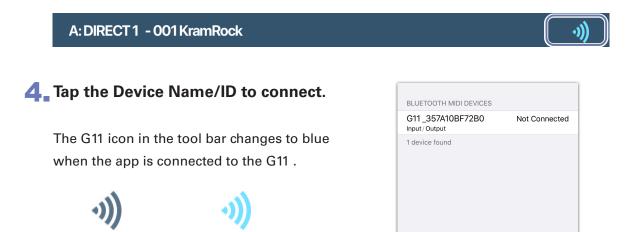

# **Connecting to the G11**

#### NOTE

• A separate ZOOM BTA-1 Bluetooth adapter must be installed in the G11 to remotely control it from an iPhone. With a BTA-1, transmission up to 10 m is possible when used indoors without obstacles.

- **1** Turn on the G11.
- **2.** Tap the Handy Guitar Lab for G11 app icon. Handy Guitar Lab for G11 will launch.
- **3** The Bluetooth MIDI Devices List will appear when it is launched. To open the Bluetooth Device list tap the G11 button in the toolbar.

**5** The G11 and Handy Guitar Lab for G11 will briefly sync up.

Connected

Not connected

Handy Guitar Lab for G11

#### NOTE

• If connection is not successful, move the iPhone closer to the G11 or move both to a place where nothing interferes with radio waves and try connecting again.Confirm also that the Bluetooth function of the iPhone can be used.

## **Importing IRs**

Importing IRs from Handy Guitar Lab for G11 allows you to quickly access IRs from locations on your iOS device like Dropbox, iCloud or the local file system.
