beyerdynamic SPACE MAX

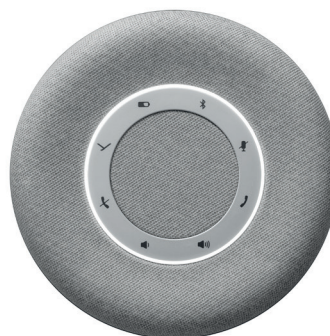

Speakerphone

Order # 728.756 (Charcoal)

Order # 728.721 (Nordic Grey)

DESCRIPTION

The beyerdynamic SPACE MAX speakerphone combines great intelligibility of speech and excellent audio quality for the reproduction of speech, media and music.

Whether in a large meeting room, huddle room or personal office – beyerdynamic SPACE MAX is the perfect plug-and-play solution for hybrid working. Within seconds, beyerdynamic SPACE MAX can be connected to a laptop, smartphone or tablet via USB or Bluetooth®. Pairing is even faster with Android end devices thanks to Google Fast Pair.

Thanks to the compatibility with common communication platforms such as Microsoft Teams® and Zoom, telephone calls, virtual meetings or hybrid seminars can be started quickly and easily. beyerdynamic SPACE MAX is officially certified for Zoom and is also compatible with Microsoft Teams®.

The high-quality speaker system automatically switches between Voice Mode for intelligible speech reproduction and Music Mode for lively music reproduction.

Thanks to beamforming technology and state-of-the-art signal processing, the microphone system with four MEMS microphones automatically detects whether the incoming sound is voice or noise. Unwanted reverb, echoes and feedback are suppressed.

To ensure the best quality in conversation, beyerdynamic SPACE MAX automatically adjusts the volume of all voices. Full-Duplex also enables simultaneous speaking and listening – without any interruptions.

The integrated 360° SMART MIC TECHNOLOGY ensures maximum freedom of movement for telephone calls or large meetings with up to 6 participants (up to 12 people in Conference Cascade mode).

For large meetings, two devices can be connected to each other with the optionally available Cascade Cable SPACE MAX. The Business Mode ensures that unwanted nearby Bluetooth® devices will not connect.
