

Recordex T-Core™ Commercial Stereo Tape Duplicators

Long Life Stereo Heads Standard

Every Recordex Cassette Duplicator ships with our exclusive T-Core™ Stereo Record and Play Heads. Many customers say our heads provide almost CD quality sound on their copies. We humbly agree, and it's standard on all our models.

Perfect Copies Every time

Our duplicators will virtually run themselves with fantastic results. However, for those pros who like a little more control, you'll be pleased to find LED Peak Level Indicators and calibrated independent volume controls for each channel.

Designed for World Travel

We are always surprised by just how many places around the world our duplicators have traveled. With our built-in global switchable 110/220V power it's easy to see why you'll find us most anywhere!

Commercial Grade Quality

Our duplicators are designed for heavy use, and we know that in the real world plastic shells just don't last as long as heavy-duty steel cases. Don't settle for less, demand Recordex Commercial Grade.

Compare... Recordex vs. The Rest

Since 1969, you'll find that no one matches Recordex quality and features for the price. With up to 33% more capacity, long life T-core™ stereo heads, and heavy duty design, our duplicators offer you the best value in the industry!
