

Flat-Base Lighting Stand

LS7920BLT / 14167

NEW PRODUCT

Features and Benefits

An efficient, secure way to erect and dismantle portable lighting, our LS7920BLT Lighting Stand features three mounting bars and a height-adjustable shaft that extends to 10', providing support for tall, complex lighting configurations. Perfect for use in tight spaces, the flat, heavy base maintains a low profile yet delivers exceptional balance and stability. The top T-bar mounts four PAR cans while the two side bars each mount two PAR cans, and hardware is included for mounting all eight fixtures. The integrated carrying handle on the base features a padded cover to facilitate ergonomic set up, teardown, and transportation. For added value, the versatile upper shaft reverses to reveal a 1.38" end that transforms the lighting stand into a speaker stand.
