

It is very important and necessary to rotate the headphone ear cups to the open position before attempting to extend the headband to the correct position on your head over the ears.

iCans adjustment

Wear your iCans as shown on picture 1 to achieve the best sound perception: Adjust the headband individually (picture 2) until it fits your head and lays safely placed on the back of your head and the cable's way out is directed vertically (picture 1).

Picture 2

iCans folding mechanism

1. It is important and necessary to push together completely the headband to basic position as shown (basic position: picture 1) before you initiate the folding mechanism of your iCans.

Picture 1

2. Twist softly the ear cups of your iCans as shown on picture 2. Twist the ear cups until they reach flat position (see picture 3).

Picture 2

3. Push softly the ear cups as shown on picture 3.

Picture 3

4. Now your iCans is folded for safe placement in the iCans box (picture 4).
