Dual-Pole Floor Stands

When combined with a mount, our TS series floor stand allows you to place a plasma display in a horizontal or vertical position (with PSM mount only). You can adjust display height to any point along the stand's vertical poles to achieve the perfect viewing height. The display then locks into place. Available in 60", 72" and 84" heights, the poles also serve as a conduit for cabling. Stands mate with our PSM or CTM series plasma mounts, which must be added separately to complete the system. Features chrome poles. Optional shelves and cover packs are available. See pages 34-35 for details.

DUAL-POLE FLOOR STANDS

Dual-Pole Floor Stands, Single Display

You can also create a videowall of four to six displays. Call inside sales for details and to order.

Silver Base	Dark Gray Base	Height	Suggested List
