MUSE RESEARCH RECEPTOR™ HARDWARE PLUG-IN PLAYER Designed to run your virtual instruments and effects, RECEPTOR is equally at home on the stage or in the studio. RECEPTOR takes the best software-based synthesizers and effects processors, and turns them into real instruments. With the push of a button, it transforms itself from a sampler into a guitar processor, a drum module into a synthesizer or a delicate mastering tool into a screaming drawbar organ. It is compatible with Windows VST and “Receptorized” plug-ins. It can simultaneously run multiple VSTi instruments and effects. Use it in stand-alone mode for live performance or connect it to your network in the studio and reduce the burden on your DAW CPU. Up to 10 RECEPTORS can be connected to a single computer via gigabit Ethernet. Control it entirely from the dedicated hardware front panel controls or attach a monitor, mouse, and keyboard to view the mixer-like software interface. It has 24bit/96kHz converters, balanced line-level inputs and outputs, S/PDIF digital input and output, high-performance front panel instrument input and 8-channel ADAT optical output. Includes a collection of 6 complete “rompler” programs from Plugsound (\$600 value) and IK Multimedia’s Amplitude DUO (\$99 value) along with dozens of other virtual instruments and effects. Also available is Native Instruments Complete and/or IK Multimedia’s Total Workstation fully pre-loaded onto the unit, please call for more information.

ITEM	DESCRIPTION	PRICE
RECEPTOR-2+PRO	1TB HD, 4GB RAM, 3.0GHz dual-core Intel CPU	2599.00
RECEPTOR-2+PRO-MAX	1.5TB HD, 4GB RAM, 3.3GHz dual-core Intel CPU	3199.00
RECEPTOR-VIP	1TB HD, 4GB RAM, 2.9GHz dual-core Intel CPU	1599.00

MUSE RESEARCH MUSEBOX This portable musical instrument and effects box uses virtual instruments and effects technology so you can easily take them to rehearsals, gigs or the studio. It uses technology derived from the RECEPTOR hardware plug-in player and features a flexible I/O with guitar and microphone inputs, MIDI, USB, line level outputs, headphone out, Ethernet and VGA video output. Tweak and program instruments and effects by simply connecting a mouse, monitor and keyboard directly to the MuseBox. Or edit and program remotely by connecting the MuseBox to your computer and running the exclusive Muse Remote software. It comes pre-loaded with essential high quality keyboard sounds, Peavey’s ReValver HP Guitar Amp Modeler, and effects including Reverbs and Chorus.

SM PRO AUDIO V-MACHINE STAND ALONE VST PLAYER

A table top VST/VSTi hardware playback module that allows you to take your plug-ins on the road or to a different studio and access them live without your computer. It comes loaded with an array of ready-to-play instrument and FX plug-ins—analogue synths, electric pianos, and more—so you can start using it right away. Multiple plug-ins can be pre-loaded into bank/preset memory for immediate access. Carry your custom banks and presets on USB memory sticks, even stream samples from an external hard drive. Use the included VFX host software (PC & Mac) to quickly configure your VST plug-ins for performance—splits, layers, levels, FX, pan, MIDI control. It has full external MIDI controller support allowing access to available loaded plug-in parameter controls such as virtual dials, switches, and faders. The hardware itself contains a 1GHz CPU, 512MB of internal RAM, 1GB of flash memory for plug-ins and presets, and is capable of 24bit/192kHz DAC. Connections include (1) 1/8" stereo audio input, (2) 1/4" TS outputs, (1) 1/8" headphone output, (2) USB ports for dongles and/or controllers, (1) MIDI input, (1) USB type B slave (USB-MIDI class-compliant), and 12V power port. Included V-Machines control software is compatible with Windows, Mac OSX, and Linux.
