ANTON BAUER EGRIPIZ HANDHELD CAMERA SUPPORT

EgripZ handles are a flexible polymer to make the camera easier to hold securely and comfortably - on the hottest day or in the trickiest of positions. Weighs just 12.2oz and mounts easily to the camera’s 1/4-20 tripod mounting. It can flex into virtually any position around the camera without getting into the way of normal camera operation. One hand operation is more comfortable with EgripZ as a forearm support - preventing the camera from “rolling” on the operator’s wrist. Low shots and high perspectives are much easier and steadier with two hands to stabilize the camera. EgripZ attaches easily a monopod or other support for additional stability via the 1/4-20 base mount.

ANTON BAUER STASIS FLEX POWER SUPPORT SYSTEM

By redirecting the weight of the camera into the torso and over the shoulder, the weight of the camera is redistributed off the operators hand, relieving fatigue and stabilizing shooting. With its revolutionary, patent pending infinitely adjustable mechanism which allows the operator to position the camera in virtually any shooting position—forward/back, in/out, up/down—the camera can be repositioned instantly and locked in place at the touch of a lever. Stasis Flex can be used as a standalone body support, with hard points on the rear pad to mount peripherals like wireless receivers, hard drives or transmitters.
