ROLAND GR55 GUITAR SYNTH PEDALBOARD

A guitar/bass modeler and synth with a powerful triple-core engine that consists

of 2 PCM synthesizers (with over 900 tones each powered by the latest Roland synthesis technology) and COSM® guitar modeling, featuring a virtual treasure trove of guitar, bass, amp, and synth models. Together, these combined technologies allow you to create unique, revolutionary sounds. The "Metal Synth Lead" preset, for example, combines two types of thick, brilliant synth textures with an overdriven solid-body/humbucking tone for incredible punch and power.

Feature highlights include: revolutionary fusion of guitar synthesis and powerful COSM® guitar modeling, up to 4 sound sources at a time (2 PCM synth tones, plus COSM® guitar modeling and normal guitar input), easy to use and easy to play with hundreds of great sounds for rock or pop guitarists, superb sound quality and lightning-fast processing, over 900 latest fully editable PCM sounds (including pianos, organs, strings, vintage synths, and more), 2 types of multi-effects engines, global reverb, chorus, delay effects, onboard looper, and a built-in USB audio player with foot control. Available with or without GK-3 Divided Pickup.

ROLAND V-GUITAR SYSTEM

An ultimate guitar modeling system for unlimited sound creation possibilities. It features 2 separate guitar and COSM amp systems; allows 2 different types of modeled guitars simultaneously and to create different amp sounds to use with each guitar type. Equipped with 2 effects systems featuring a huge selection of BOSS effects, including COSM effects. All this enables perfect processing for each individual guitar. Dual modeling engines allow guitar and amp models to be dynamically switched, layered and combined.

Other feature highlights include the new COSM® electric, acoustic and even bass guitar models, new synth waves such as the famous GR-300, and a guitar to MIDI converter for direct connection to keyboards, sound modules, soft synths, computers, and other MIDI-compatible devices. Supports USB audio and MIDI for easy digital recording and sequencing. Dual GT-Pro-class effects processor enables unequalled flexible tone creation and advanced performance controls, including D BEAM, V-LINK and Ribbon Controller. Simple and intuitive knob-based interface and new design supports live performance. A graphical software Editor is included to support sophisticated sound making. Versatile I/O includes USB, S/PDIF and XLR for virtually every type of music production and performance on stage to professional studio recording.
